## S500 UL1077

Miniature  
circuit breakers

S500-H11

### Auxiliary contacts

The auxiliary contacts will signal whether the breaker is in the ON or OFF position.

### Bell alarm

The bell alarm includes a set of contacts that will only signal when the breaker has tripped.

Typically the contacts would be connected to an alarm or bell to signal the operator that an overcurrent trip has occurred. The bell alarm also includes a test button for testing the alarm contacts without opening the breaker.
