## New range of heavy duty safety switches Safe, modern, high performance range

The next generation of heavy duty safety switches offer a complete range of fusible and non-fusible solutions from 30 to 1200 Amperes. Our new range meets all relevant standards UL98, UL50, UL50E, NEMA KS-1 and CSA.

Designed for heavy duty applications
ABB's safety switches are designed for applications requiring heavy duty performance and are suitable for use as service equipment where applicable. Our products are well suited for the food \& beverage industry, HVAC, water/wastewater treatment facilities, commercial buildings and much more.

Choose safety and high performance - choose ABB Our next generation engineered heavy duty safety switches are designed to live up to our customers needs.

## High performance

200 kA short-circuit withstand capability across the whole range makes EOH and EOHU suitable for the most demanding applications.

Increased safety
Visible double break contacts through windows in the modern touch safe switch insert.

Easy installation
Spacious interior and rounded edges make wiring safe, easy and fast. Gasket included in all NEMA classes.

Savings in maintenance
The modular switch insert and related components can easily be replaced creating savings in both downtime and money.

Complete range of fusible and non-fusible HD safety switches from 30 to 1200 Amperes
The robust enclosures are made in steel, stainless steel or acid proof steel sheet covering all NEMA classes up to $4 X$.

The next generation of heavy duty safety switches offer a complete range of fusible and non-fusible solutions from 30 to 1200 Amperes. Our new range meets all relevant standards UL98, UL50, UL50E, NEMA KS-1 and CSA.

## Enclosed heavy duty fusible 3-pole safety switches From 30 to 1200 Amperes
