Catalog Description: NFB80E-14 250-500V50/60HZ-DC Contactor

Long Description: NFB contactor relays comply with the latest railway rolling stock

NFB contactor relays comply with the latest railway rolling stock standards and allow install ation in passengers or driver cabins for trains frequently operating tunnels or underground s. They are used for switching auxiliary and control circuits. Improve the compactness of the installations thanks to reduced dimension and side-by-side mounting requiring less 15% width (without spacing) from -40 °C up to +70 °C. Meet all main rollling stocks standards: IE C 60947-4-1, IEC 60947-5-1, IEC 60077-1/-2 and applicable parts of EN 50155 standards, shocks and vibration withstand conforming to IEC 61373 cat. 1, class B. Reach the highest levels in fire and smoke behaviour with compliance to European standard EN 45545-2 (HL2, HL3 hazard levels) in group mounting. Reduce train energy with lighter devices and requiring 68% less coil energy consumption in operation. Electronic coil interface accepting sinus oïdal AC 50/60 Hz control supplies included inside Ucmin.... Ucmax voltage range. Max per mitted AC 50/60 Hz control voltage must not be exceeded (see technical data). Wide range of auxiliary contact blocks for front and side mounting.
