The ASIUK series of IEC terminal blocks is the first complete terminal block family that is totally compatible with manufacturers such as Phoenix Contact®. The ASIUK terminal blocks feature the same quality design features and materials of the popular UK and UKN series including UL94 V0 housings, nickel plated copper alloy metal bodies and plated high tensile alloy crews. Careful detail has been given to this product family so that accessories are interchangeable and the costs associated with using another brand are eliminated.

One of the added features with the control wiring blocks, such as the ASIUK2.5N, ASIUK3N and the ASIUK5N along with others of similar spacing, is the ability to use a low-cost plug-in jumper.

The ASIUK series meets international approvals including UL and cUL and all products are RoHS compliant.
