

Slimline Single Phase

DIN Rail DC Switching Power Supplies

PROVEN POWER IN A SMALL FOOTPRINT

The DM Series slimline single phase DC power supplies provide optimal switching technology in a compact package. Through industrial design and rugged construction quality, the Slimline provides maximum uptime in a diverse range of manufacturing environments. These highly efficient DIN Rail switching power supplies ensure reliable startup of heavy loads.

The Slimline's narrow profile consumes limited space on the DIN Rail, making efficient use of control cabinet real estate. The supply's rugged metal case and secure mounting clip ensure quick and easy installation on the DIN Rail. Highquality performance, long-life expectancy, and operation under a wide range of temperatures contribute great value to demanding applications.

The Slimline is available in a variety of wattages (72-480) and voltages (12-48).

- » Narrow width conserves valuable space on the DIN Rail
- » High peak power eliminates the need to oversize your power supply
- » Universal input 90-264 VAC, 50/60 Hz without voltage gaps for full product application versatility
- » Adjustable output voltage compensates for voltage drop
- » Power Factor Correction meets EN61000-3-2
- » "DC OK" LED indicator identifies local output status
- » Easy, snap-on mounting on DIN Rail
- » Fully enclosed touch-safe enclosure and terminals
- » Certified to UL, TUV and CE safety standards for use worldwide
- » UL508 listed for use at full-rated power
- » Most models capable of parallel connection to provide redundancy for critical load applications
- » Industrial design
 - -20°C to +60°C operation without derating
 - Overload and short circuit protection
 - · Rugged metal case
 - Power boosting circuitry
- » Meets SEMI F47-200
- » RoHS compliant
- » 5 year warranty

Full Line Specifications:

Input voltage range 90-264 VAC

Nominal voltage 100-240 VAC

Input frequency 47-63 Hz

Load regulation drift +/- 1%

Short circuit automatic recovery

Storage temp -40°C to +85°C

Operating humidity 5% to 90% RH, non-condensing

Overcurrent protection: continuous protection and automatic recovery (110% - 130%)

Over/Undershoot < 500mV from 50%-100% load change @ 0.2A/µSec.

Hold-up Time ≥ 20 mSec

Start-up Time < 1 Sec

Meets EN61000-3-2 harmonic distortion

Meets EMI standards EN55022, FCC15B, EN55024

Meets vibration & shock standards IEC68-2-6. IEC68-2-27

All models have internal fuse protection

Applications:

» Industrial/Machine control

» Packaging

» Process control

» Robotics

» Conveying equipment

» Welding

» Material handling

When you want superior product performance and reliability, off-the-shelf availability, industry-leading technical support, and customer service that's rated second to none, choose Acme - the first name in power solutions.
