## CYLINDRICAL INDUCTIVE PROXIMITY SENSORS

Altech Cylindrical sensors are available in diameters ranging from 4mm (.16 in.) to 30mm (1.18 in.) with sensing distances up to 40mm (1.57 in.). Most models feature nickel plated brass (BN) housing, but stainless steel (SS) and non-metallic versions are available. Both flush mount and non-flush mount sensors are available. Flush mount versions are often called shielded or embeddable. Non-flush mount sensors are also called non-shielded or non-embeddable. Non-flush sensors have larger sensing distances than their flush mount counterparts. All Inductive sensors meet IP67 (NEMA1, 3, 4, 6, 12, 13) protection levels. Please refer to pages 132-133 of this catalog for more information.

## FLUSH MOUNT CYLINDRICAL SENSORS

Flush Mounted, sometimes called embedded or shielded sensors, have electromagnetic fields concentrated directly in front of the sensing heads and may be mounted directly into metal mounting brackets or embedded directly into metal without causing a false output. **Figure 8** also illustrates that on Cylindrical Flush Mount sensors there should be at least 1 diameter of distance between adjacent sensors, and no non-target metal surfaces should be less than 3 times the sensing distance  $S_n$  directly across from the sensing head. Also, two directly opposite sensors mounted in metal should be greater than 6 times the sensing distance apart.

**Sensing Distances – AC, DC, Cylindrical Style Sensors**

DC	5 mA	120 mA	200mA	400 mA

**Sensor Wiring Systems – AC, DC Cylindrical Style**

AC	2-Wire		
DC	2-Wire	3-Wire	4-Wire

## NON-FLUSH CYLINDRICAL SENSORS

Sometimes called non-embedded or non-shielded, non-flush sensors have electromagnetic fields with a wide sensing angle and are unshielded (no metal surrounding the sensing head). Care must be taken to insure that no non-target metal comes in near proximity to the sensing head. Distances are demonstrated in **Figure 8**. Adjacent sensors should be separated by at least 2 times the diameter. Non-target metal should be at least 3 times the sensing distance directly across from the sensing head. Two directly opposite sensors should be at least 6 times the sensing distance apart.

### OUTPUT CONNECTIONS

AC,DC – Normally Open (NO),  
and Normally Closed (NC).  
DC Namur – Special interface  
Circuits required.  
DC Analog – Analog Output 1 to 9V.

### OUTPUT CABLES

Cylindrical Sensors are provided with 2 meter PVC fixed cables. 5 meter PVC, 2 and 5 meter PUR cables are optional and specified by selection of the last two digits of the part number. See chart below.

Cable Length & Material	Part No. Last Digits
2m PVC	00
5m PVC	02
2m PUR	10
5m PUR	12

### QUICK DISCONNECT CONNECTORS

Pulsostronic sensors are available in a wide selection of Quick Disconnect styles for DC and AC circuits. While virtually any sensor can be custom manufactured with a Quick Disconnect connector, Altech offers one of the largest selection of standard Quick Disconnect models.

### CYLINDRICAL SENSOR INSTALLATION

#### Flush Mount Installation

#### Non-Flush Mount Installation

#### Opposing Installation

Quick Disconnect models are designed to be user-friendly and to simplify installations.

Please see the product specification for sensors with quick disconnect connectors and matching cable assemblies on pages 116 to 121 in the accessory section.

#### Mounting Brackets – see Pages 114-115

**General Mounting** – You must maintain minimum distance between adjacent and opposite sensors in addition to non-target metals as specified in the drawings above. Flush mount sensors must extend at least 0.2 times the sensor diameter above the adjacent metal housing. Non-flush mount sensors must extend a distance greater than the sensing distance (Sn). Please contact Altech for any installation assistance

**Fixed Cable**

PVC 2m (6ft. 6in.). For 5m (16 ft. 5 in.) cable length, change the last two digits of the part number to 02. For other cable lengths and/or PUR cable, please consult Altech. Supplied with Brass, Nickel Plated (BN) locknuts.

**48/68 Style Connector**

3-pin, Micro style, 12mm (.47 in.) supplied with Brass, Nickel Plated (BN) locknuts.
