

## TABLE OF CONTENTS

Mini fuses in five sizes to 20 Amps.

- · Slow Blow
- Medium Blow
- Fast Blow
- Super Fast Blow

**Fuses** 

"Bottle" fuses in five sizes to 200 Amps.

- gL/gG Slow Blow
  - Fast Blow
- gR Semiconductor Protection

**Fuses** 6-7 Accessories

# **NEOZED**

Compact fuses in three sizes to 100 Amps.

- gL/gG Slow Blow
- •gR Semiconductor Protection

# CYLINDER

Standard cylinder fuses are available in four sizes to 125 Amps, with or without blown fuse Indicator Pins.

- gl/gF Line Protection
- Motor Protection aM
- Semiconductor • gR Protection

Cylinder Bolt fuses are available in two diameters with multiple fixing centers.

• gR - Semiconductor Protection

Fuses - Standard 12-13 Fuses - Bolt 14 Accessories 15

Knife Blade or Stud Mount designs in six sizes with currentratings of 2 to 1600 Amps.

- gL/gG Line Protection
- aM - Motor Protection
- gR/aR - Semiconductor Protection

4-5

10-11

8-9 10-11

16-21 19

## ITALIAN

Cylinder style fuses available in four sizes with current ratings from 2 to 100 Amps.

- Line Protection • ql

# **BRITISH**

British Line Proection fuses are available with four mounting plate designs with current ratings from 2 to 63 Amps.

- gG Line Protection British Semiconductor fuses are available in single and double body units with multiple diameters and fixing centers.
- aR - Semiconductor Protection

Fuses - Line 23 24-25 Fuses - Semi.

# **SQUARE**

Square body fuses for semiconductor devices to 1000 Amps.

• aR - Semiconductor Protection

26-31 Fuses 19 Accessories

**Fuses** 

Fuses for distribution circuits in four sizes to 36KV.

# **ACCESSORIES**

Screw Caps

- Adapter Screws and Rings
- Fuse Base Covers
- Fuse Bases
- Tools

32-33

- End Plates
- Microswitches
- Terminal Covers
- Fuse Handles

10-11, 15, 19

Siemens Cross Reference

22

**Fuses** 

34-35

#### **NEOZED**

Neozed Fuses are more compact than the Diazed Fuses. Three sizes are available, D01 to 16 Amps, D02 to 63 Amps and D03 to 100 Amps. Fuse accessories are sized to match. Each size fuse body has a different diameter to fit only into the appropriate Screw Cap and Fuse Base. (See illustration pg 10.)

Also, the fuse tips have different diameters, depending on their current rating. The diameter of the tip matches the diameter of the hole in the Adapter Ring to insure that no fuse with a higher rating than intended for the circuit can be installed. This prevents damage to the circuit or equipment the fuse protects. Additionally, fuses and Adapter Rings are color coded to avoid mismatching; for example: 10 Amp Neozed fuses have red pop-out indicators on their head, matching the red 10 Amp Adapter Ring.

When a Neozed fuse has blown, the color coded indicator on the head of the fuse will pop out, giving visible indication through a glass window in the Screw Cap.

The Fuse is held in place by the Screw Cap, which is screwed into the Fuse Base. Neozed Fuse Bases are available in one and three pole designs. Fuse Bases can be panel mounted or snapped onto a standard 35mm DIN rail.

#### **Operating Classes**

#### gL/gG - Slow Blow

Protect cable, conductors, and equipment from damage due to overload and short circuits.

Typical Markings: gL/gG

gR - Semiconductor Protection Protects semiconductors like diodes, SCRs, etc. Current limiting super fast blow characteristic for short circuit protection.

Typical Markings: Ultra Rapid™, Ultra Quick™, Recticur™, gR,

Mostly red, orange, or blue imprint.

## DIAZED AND NEOZED **ACCESSORIES**

#### **SCREW CAP**

The Screw Cap types offered fit the various fuse and Fuse Base sizes. They hold the fuses in place and connect the head of the fuse with the load side of the Fuse Holder. The colored blown fuse indicator on the head of the fuse is clearly visible through a small window in the top of the Screw Cap. A small test hole on the side of the Cap allows for a probe to test if voltage is present on the metallic surface on the head of the fuse.

#### **ADAPTER SCREW / RING**

Adapter Screws are used with the Diazed, and Adapter Rings are used with the Neozed Fuses. Three sizes of Screws and Rings are available to fit the diameter of the different size fuse bases. Adapter Screws are porcelain rings with a center hole on one side, a threaded stud on the other and one notch on each side. The inside diameter of the center hole of the Adapter Screw matches the diameter of the tip of the Diazed fuse for which it is intended. This helps to eliminate the insertion of fuses with higher current ratings than allowed. The integral threaded stud installs into the appropriate Diazed Fuse Base. Adapter Screws and Rings are color coded to the fuses.

#### **FUSE BASE**

Fuse Bases hold fuses in place (in conjunction with the Screw Cap) and insure proper electrical connections. They snap easily onto standard 35mm DIN rail or can be panel mounted. They are available in one or three pole designs. Matching Covers are available. The line is connected to the metal tab at the bottom of the fuse base. The load is connected to the metal ring into which the Screw Cap is installed.

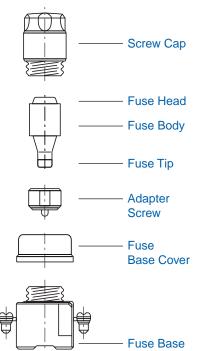

#### **FUSE BASE COVER**

Fuse Base Covers are available in one and three pole designs to match the Fuse Bases we offer. They help prevent shock from accidental touching of conducting metal parts on the Base.

#### **TOOLS**

The Adapter Screw / Ring Tools aid in the insertion and removal of the Adapters from the Fuse Base. The Adapter Screw Tool fits into notches on the Adapter Screw for the D27 and D33 Diazed fuses. The Adapter Ring Tool fits the Adapter Rings for the D01, D02 and D03 Neozed fuses. We strongly recommend these tools be used when inserting or removing Adapter Screws or Rings to prevent electrical shocks.
