

RGA400 Series

4Q SCR Chassis Adjustable Speed Drive for PMDC or Field Wound Brushed Motors

The RGA440 Series of 4Q drives is well suited for applications that require the control of overhauling loads, frequent reversing or breaking. Installation has been made simple with cage-clamp terminals for power and logic and with on-board fusing. The RGA440 Series is very versatile and can be used in a wide range of environments. With the available field supply for shunt-wound motors, full assortment of adjustments that are standard on all our 4Q drives, and optional factory installed isolation module, the RGA440 Series is a flexible and well equipped member of our 4Q family of drives.
