## Options

- For field installed drain and breather set, order one **ECD50B4X** drain and one **BRTB4X** breather. Both are NEMA 4X rated for Group B.
- Special Polarization: Prevents plug insertion in a receptacle or connector wired for a different voltage. In installations where there are different line voltages, the special polarization option is desirable. This allows only plugs and receptacles wired for the same line voltage to be mated together. The receptacle or connector interior is positioned 22-1/2°, relative to the polarization rivet, to the right (as specified) of standard, and plug is polarized to correspond. Suffix **-P4** to receptacle or plug.
