Standard Size and Mid-Size

Application

Wallplates are an integral part of every wiring device installation, and are designed to address a broad range of functionality, from durability and safety to pleasing aesthetics. Arrow Hart's REPEL line of wallplates are the first of their kind with Agion Additive. Available in both metallic and non-metallic materials, this wallplate offering is well suited for residential, commercial, institutional or industrial application. REPEL products do not protect the user against disease causing organisms and ongoing regular cleaning practices should be maintained.
