SAVANT Occupancy & Vacancy Sensor Dual Switch Controls

FEATURES

- Can be wired as a Single-Pole or 3-Way device.
- Selectable ON/OFF LED nightlight with press and hold dimming function.
- Works with all popular load types: Incandescent, Magnetic Low-Voltage, Electronic Low-Voltage, Fluorescent, CFL and LED.
- Contains two switches to control two independent lighting loads or circuits (light and/or fan).
- Green LED indicates load status, provides locator light in dark and blinks to indicate motion detection.
- Push pad design provides minimal travel and crisp actuation.
- Replaces a standard light or fan switch.
- Provides 180 degree field of view and 1000 sq. ft. of major motion coverage.
- Provides 3-Way operation when used with a 3-Way switch or sensor.
- Selectable time delay of 5 seconds (test), 5 minutes, 15 minutes and 30 minutes for lights to remain on after room is vacated.
- Walk-in-Delay feature allows sensor to turn lights off without time delay when motion is detected briefly in room.
- Reverse Mode allows light to stay off in a room when motion is detected.
- Occupancy Sensors time delay default set to 5 minutes; Vacancy Sensors time delay default set to 30 minutes.
- Occupancy Sensor provides a selectable ambient light override preventing lights from switching ON when there is acceptable natural light.
- Occupancy Sensor Version allows to toggle between Auto-ON/Auto-OFF or Manual ON/Auto-OFF mode with a simple press and hold of switch.
- Occupancy Sensor provides for a bypass feature to allow the sensor to perform as a traditional switch (Manual ON/Manual OFF).
- Vacancy Sensor meets California 2008 Title 24.
- Electrostatic discharge protection.
- No leakage to load in off mode.
- Uniform color matched PIR lens to device housing.
- Color change faceplate kits provide for a simple in field change.
- Mid-Size Decorator wallplate included with product.
- Neutral required for installation of device.

SAVANT Sensor Dual Switch Controls

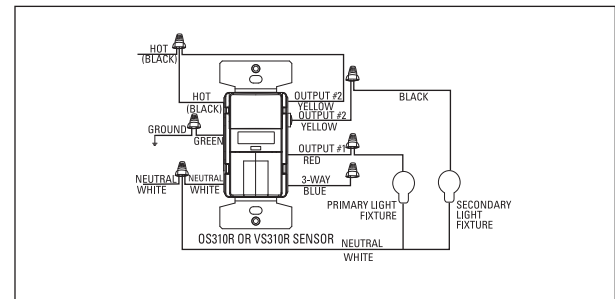

Single-Pole & 3-Way
1000W/VA

Application

SAVANT Occupancy/Vacancy Sensor Dual Switches use advanced PIR technology to sense the movement of heat-emitting bodies. Occupancy Sensors provide Auto-ON/Auto-OFF or Manual-ON/Auto-OFF operation while Vacancy Sensors provide Manual-ON/Auto-OFF operation only (Title 24 Compliant). The sensors automatically turn lights off after a space becomes vacant and a preset time delay elapses. The dual switch feature allows for control of two different loads from a single location. Both versions provide Single-Pole (single-location) and 3-Way (multi-location) wiring and work with all lighting load types (INC, MLV, ELV, FLR, CFL, LED). A selectable and dimmable LED nightlight is provided. All sensors are compatible with any decorator-style or decorator screwless wallplate.
