

## Relay Terminal Block (screw type)

### ■ Features

- For driving various loads using PLC output signals
- Easily check operation status and high luminance LED turns on with input signals
- Choose various relays depending on each load voltage or current
  - Easily replace relays using the relay removal lever (1-point relay terminal block)
- 2 mounting methods (DIN rail, screw mount)
- Tight installation and expansion possible with interlocking design (1-point relay terminal block)

※Please refer to 'I/O cable' in the I/O terminal block catalogue.

⚠ Please read "Safety Considerations" in instruction manual before using.

## ■ Replacing Relays

○ Rated load current 2/3A

● ABS-S01PA-CN / ABS-S01TN-CN

- 1) Pull the relay removal lever towards direction ① and the relay will pop up in direction ②.
- 2) Remove the relay and return the relay removal lever to its original position.
- 3) Check the socket position and insert the relay into the socket.

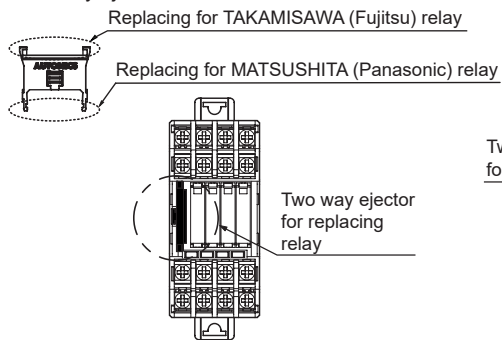

※If pulling the relay removal lever to left or right, the lever may be broken.

● ABS-S04PA-CN / ABS-S04TN-CN  
● ABS-H16PA-□N / ABS-H16TN-□N

## ■ Replacing Relays

### ○ Rated load current 5A

#### ● ABS-S01PQ-CN / ABS-S01R6-CN

- 1) Pull the protection cover towards direction ①.
- 2) Press the operation indicator guide in direction ② and remove the relay towards direction ③.
- 3) Insert a new relay into position.

※ Operation indicator guide is used for displaying operation status and removing relays

### ○ Rated load current 10A

#### ● ABS-S01PH□-CN / ABS-S01R2□-CN

- 1) Pull the relay removal lever towards direction ①. Remove the relay towards direction ②.
- 2) Insert a new relay into position.

## ■ Installation

※ Each model appearance is different by no. of relay points.

### ○ Mounting and Removal at DIN rail

#### ● Mounting

- 1) Pull the rail lock towards direction ①.
- 2) Attach the DIN rail connection hook onto the DIN rail.
- 3) Push the unit towards direction ②, then push the rail lock in to lock into position.

#### ● Removal

- 1) Insert a screwdriver into the rail lock hole and pull it towards direction ①.
- 2) Remove the unit by pulling the unit towards direction ②.

### ○ Mounting with screws

- 1) The unit can be mounted on panels using the rear rail locks.
- 2) Pull the rail locks towards directions ① and ②.
- 3) M4 x 15mm spring washer screws are recommended for installation. When using flat washers, use Ø6mm diameter washers. The tightening torque should be between 7.14 and 10.2kgf-cm (0.7 to 1.0N·m).

### ○ Connecting multiple units (1-point relay terminal block)

Connect multiple units by locking the socket (凹) and peg (凸) together in direction ①.

## ■ Installing Jumper Bars (4, 16, 32-point relay terminal block)

1) Cut the jumper bar to the user's desired length by cutting at the V dent using a nipper.

2) Unfasten all the screws of the terminals you wish to commonize.

3) Insert the jumper bar below the unfastened screws.

4) Tighten all the screws above the jumper bar.

## ■ Cautions during Use

1. Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
2. Check the polarity of power or COMMON before connecting PLC or other controllers.
3. Do not touch the unit immediately after the load power is supplied or cut.  
It may cause burn by high temperature.
4. 24VDC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
5. Wire as short as possible and keep away from high voltage lines or power lines, to prevent surge and inductive noise.  
Do not use near the equipment which generates strong magnetic force or high frequency noise (transceiver, etc.).  
In case installing the product near the equipment which generates strong surge (motor, welding machine, etc.), use diode or varistor to remove surge.
6. This unit may be used in the following environments.
  - ① Indoors(in the environment condition rated in 'Specifications')
  - ② Altitude max. 2,000m
  - ③ Pollution degree 2
  - ④ Installation category II
