

## Sensor Distribution Box (M12 4-Pin/5-Pin Connector Type)

### ■ Features

- Easy check operation by operation indicator (red/green)
- Single power operates several sensors
- Convenient wiring and power line
- IP67 protection structure with water-proof cover (IP52 protection structure with protection cover)
- Supports 1-signal, 2-signal (DC 4-wire)

## Connecting Crimp Terminals for Spring/Pluggable Screw Terminal Type

### Spring terminal type

Remove bolts on the terminal cover using a tool such as a screwdriver and open the cover.

#### • Connection

- 1) Push the end sleeve (ferrule) crimp terminal towards direction ① to complete the connection.

#### • Removal

- 1) Press and hold the catch above the terminal in direction ② with a flat-head screwdriver.
- 2) Pull and remove the end sleeve (ferrule) crimp terminal towards direction ③.

### Pluggable screw terminal type

Remove bolts on the terminal cover using a tool such as a screwdriver and open the cover. Remove the terminal also as above order.

#### • Connection

- 1) Push the end sleeve (ferrule) crimp terminal towards direction ① to complete the connection.

#### • Removal

- 1) Press and hold the catch above the terminal in direction ② with a flat-head screwdriver.
- 2) Pull and remove the end sleeve (ferrule) crimp terminal towards direction ③.

## Example of Connections

### Connection with cable type sensor

It is available to connect a cable type sensor proximity sensor (PRW Series) with a sensor distribution box directly. When installation distance is longer, use a connector cable.

### Connection with connector type sensor

When connecting a connector type proximity sensor (PRCM Series) with a sensor distribution box, use only connector cable.

## ■ Sold Separately

(unit: mm)

### ○ Protection cover (CAP-PT)

- × This protection cover is used for protecting connection holes from dust or particle, etc. Please push it into hole.
- × If using protection covers, protection structure of the sensor distribution box is IP52.

### ○ Waterproof cover (P96-M12-1)

- × This waterproof cover is used for protecting unused connection hole from water or oil, etc. Please tighten it when applying to the ports.
- × If using waterproof covers, protection structure of the sensor distribution box is IP67.

#### 3-wire (1-signal)

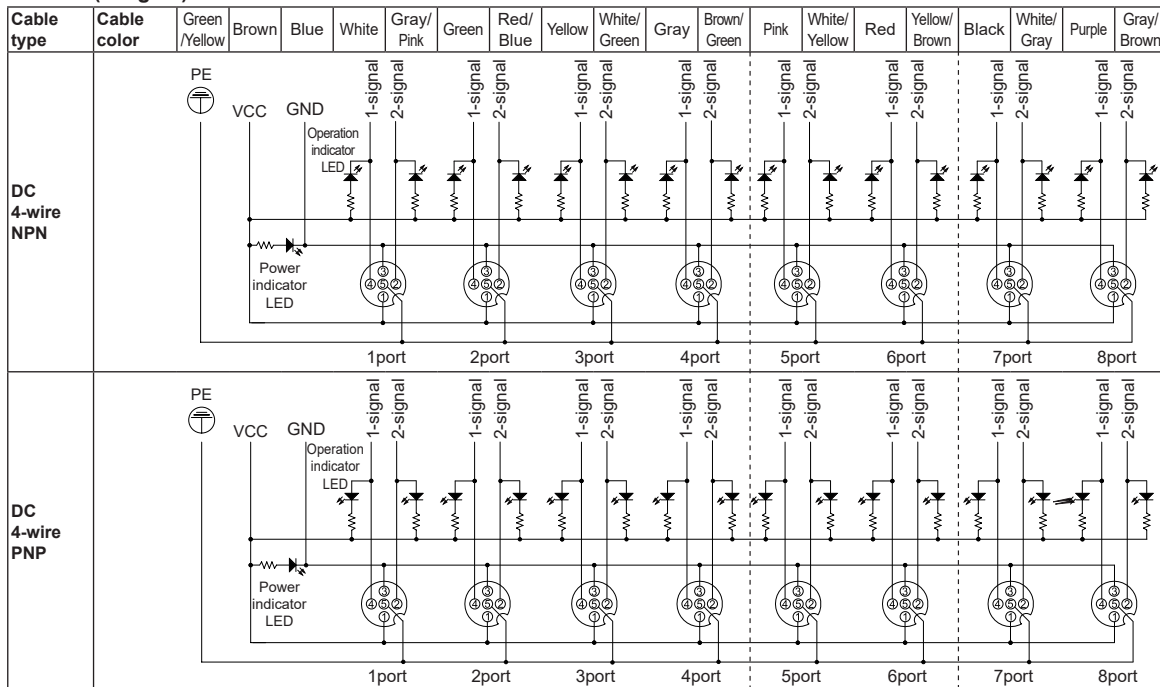

# Sensor Distribution Box

## Connections

● M12 5-pin connector type

● 4-wire (2-signal)

## Cautions during Use

1. This connection box is only for DC. Do not use this unit for AC.
2. Use DC 2-wire, DC 3-wire, DC 4-wire separately. DC 3-wire, DC 4-wire are separated by NPN type and PNP type.
3. Do not use the same conduit with cord of this unit and electric power line and power line. Also avoid the same connection.
4. Be sure that wire power cable (brown: +, blue: -) properly.
5. Check the voltage variation range of power not to over the rated specifications for power input.
6. In case of M12 4-pin connector type, the power indicator (green LED) does not operate when polarity is not correctly connected.
7. In case of M12 5-pin connector type, Tighten the screws and connector with the proper tightening strength.  
(M4 mounting screw: max. 1.2N·m / M12 Connector: 0.6 to 0.7N·m)  
When tightening is bad, protection is not effective and it may loose by vibration.
8. If transceiver is close to wire connections, it may cause malfunction.
9. When take out the connector from the box, cut off the power.
10. It might cause malfunction, if particle of metal etc. inflow in to engaging.
11. Do not use this unit when external force loaded on contact block and connection of cover. It may cause loss of efficiency of protection.
12. Follow the connections when wiring the signals. After connecting loads, operate proximity sensors.
13. Check the operation indicator when operating the sensors.
14. Do not use in place there are water or oil etc.
15. Main body is made by plastic, therefore do not put heavy load on this product.
16. Please avoid below environment for long-term storage.
  - ① Lots of dust or high humidity
  - ② Ammonia or sulfide gas
