Troubleshooting

Error	Troubleshooting
No outputs	Check the power supply. Check the polarity (+, -) when wiring cable. Check the connection part.
Abnormally fluctuating output	Check the power supply. Check the supplied pressure. Check the pressure line.
Out of zero point output value	Check the power supply. Check the load resistive value of current output type for a receiver is over 600Ω. Check the measuring point and transmission distance. Check the line resistance is below 600Ω.

Cautions during Use

- Follow instructions in 'Cautions during Use'. Otherwise, It may cause unexpected accidents.
- 15-35VDC power supply should be insulated and limited voltage/current or Class 2, SELV power supply device.
- When installing the unit on pipe line, use the hexagon part of connections not to turn the unit with a pipe wrench. Do not use the unit with strong vibrations.
- Store the unit at the place without moisture, dust, and vibration.
- This product which does not have drive part at sensing part does not need to repair it. Even though inside of pressure pipe is normally clean, it needs to take maintenance once a year as below instructions.
 - Check the broken status of outside.
 - Check the pressure slot, cleanliness inside, and corrosion state.
 - Short each terminal and check the insulation resistance between the case and power.
- When removing a sensor for maintenance, follow the below instructions.
 - Replace an O-ring which is used once.
 - Be sure that diaphragm part is not damaged.
- Switch or circuit breaker for supplying or cutting off the power should be installed nearby users for convenient control.
- The unit cannot be repaired due to disassembled structure.
- The unit is fixed with bolt and nut at the both sides of case.
Do not press excessive load (approx. 300kg/cm²), or it may cause damage to the unit.
- This unit may be used in the following environments.
 - Indoor / Outdoor (in the environment condition rated in 'Specifications')
 - Altitude max. 2,000 m
 - Pollution Degree 2
 - Installation Category II
