## L25 Incremental Optical Encoder

## Mechanical Specifications

Shaft Diameter: $1 / 4^{\prime \prime}$ nominal
Flat On Shaft: 0.80 long $\times 0.03$ deep
Shaft Loading: up to 5 lbs . axial and 8 lbs . radial
Shaft Runout: . 0005 T.I.R. maximum
Starting Torque at $25^{\circ} \mathrm{C}$ : 0.07 in-0z typical, 0.12 in-0z maximum without sealed bearings; 0.50 in-oz typical, 1.0 in-oz maximum with sealed bearings
Bearings: Class ABEC 5
Shaft material: 416 stainless steel
Bearing Housing: Die cast aluminum with iridite finish
Cover: Drawn aluminum, $0.060^{\prime \prime}$ wall, protective finish standard. Die cast aluminum
with protective finish for EM, SM, ECS and SCS terminations
Bearing Life: $1 \times 10^{9}$ revs ( 6,700 hrs at 2500 RPM)
Maximum RPM: 10,000
Moment of Inertia: $4.1 \times 10^{-4} 0 z-\mathrm{in}-\mathrm{sec}^{2}$
Weight: 13 0z. typical

## Electrical Specifications

Code: Incremental
Cycles Per Shaft Turn: 1 to 28,800
Voltage/Output: (see note 5)
15VN: Line Driver, 5-15 VDC in, Vout $=$ Vin
28VN: Line Driver, 5-28 VDC in, Vout $=$ Vin
$28 \mathrm{~V} / 5 \mathrm{~V}$ : Line Driver, $5-28$ VDC in, Vout = 5 VDC
28V/OC: Open collector, 5-28 VDC in, OCout
Current Requirements: TLL: 175 mA maximum 125 mA typical
Output Format: 2 channels in quadrature $=27^{\circ}$ electrical typical. Optional index is typically gated $1 / 2$ cycle wide (see figure 1 )
Protection Level: Reverse, overvoltage and output short circuit (4469, 7272 only)
Frequency Response: 100 kHz (see note 7), up to 800 KHz with interpolation option Output Terminations: (see table 1) Incorporating the same high quality optics and electronics as the H 25 ,

## Environmental Specifications

Enclosure Rating: NEMA 2 (IP43)
Temperature: Operating, $0^{\circ}$ to $70^{\circ} \mathrm{C}$; extended temperature testing available
(see note 8); storage; $-25^{\circ}$ to $90^{\circ} \mathrm{C}$
Shock: 50 g 's for 11 msec duration
Vibration: 5 to 2000 Hz @ 20 G's
Humidity: 98\% RH without condensation industry and flow metering.

NOTES \& TABLES: All notes and tables referred to in the text can be found on the back of this page.

## Model L25 Ordering Options

Use this diagram, working from left to right to construct your model number (Example: L25G-F3-SB-2000-ABZC-28V/N-SC18).

## Dimensions

L25G - M16 or M18

## Optional Face Mounts

## Tables

## Table 1-Incremental Output Terminations

The connector style will determine pinouts. For example, an encoder with ABC channels and an M18 connector uses the table to the right.

| M14 CONNECTOR | M16 CONNECTOR | CHANNELS DESIGNATED IN MODEL NO. |  |
| :---: | :---: | :---: | :---: |
| PIN | PIN | ABZ | ABC |
| E | A | A | A |
| D | B | B | B |
| C | C | Z | $\bar{A}$ |
| B | D | +V (SUPPLY VOLTAGE) |  |
| F | E | - | $\bar{B}$ |
| A | F | OV (CIRCUIT COMMON) |  |
|  | G | CASE GROUND (CG) (except H20) |  |

| M18 CONNECTOR |  |
| :---: | :---: |
| PIN | CHANNEL |
| A | A |
| B | B |
| C | $Z$ |
| $D$ | $+V$ |
| E | - |
| F | $0 V$ |
| $G$ | CG |
| $H$ | $\bar{A}$ |
| I | $\bar{B}$ |
| $J$ | $\bar{Z}$ |

| WIRE COLOR <br> (22AWG) | DA 15P <br> CONNECTOR | CHANNELS DESIGNATED IN MODEL NO. |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | ABZ | ABC | ABZC |  |
| YEL | 13 | A | A | A |
| BLUE | 14 | B | B | B |
| ORN | 15 | Z | - | Z |
| W-Yel | 10 | - | $\overline{\mathrm{A}}$ | $\overline{\mathrm{A}}$ |
| W-Blu | 11 | - | $\overline{\mathrm{B}}$ | $\overline{\mathrm{B}}$ |
| W-Orn | 12 | - | - | $\overline{\mathrm{Z}}$ |
| RED | 6 | $+\quad$ +V (SUPPLY VOLTAGE) |  |  |
| BLK | 1 | OV (CIRCUIT COMMON) |  |  |
| GRN | 9 | CASE GROUND (CG) (except H20) |  |  |
| WHITE |  | SHIELD DRAIN (Shielded Cable Only) |  |  |

| M12 CONNECTOR |  |
| :---: | :---: |
| PIN | CHANNEL |
| A | A |
| B | B |
| C | $Z$ |
| $D$ | $+V$ |
| $E$ | - |
| $F$ | $O V$ |
| $G$ | $C G$ |
| $H$ | $\bar{A}$ |
| $J$ | $\bar{B}$ |
| $K$ | $\bar{Z}$ |

## Table 2-Disc Resolutions for Incremental Encoder Model L25

$1,2,3,5,6,7,8,10,13,16,20,24,25,26,30,32,33,34,36,37,40,45,48,50,51,56^{\star}, 60,64,66,72,75$, $80,86,88,90,100,102,120,122,125,127,128,132,144,148,150,158,160,175,176,180,187,192,200$, 202, 204*, 217, 220, 240, 250, 254, 255, 256, 264*, 274, 280, 283, 288, 292, 300, 312, 320, 321, 325, 360, $366,372,375,377,380,381,384,385,393,400,430,432,450,462,480,490,500,502,508,512,522$, $530,550,560 *, 576,598,600,604,625,628,635,638,640,660,672,676,680,687,690,700,720,725$, $735,740,744,748,750,762,768,780,785,800,812,825,850,864,878,888,900,912,914,938,942$, $955,960,1000,1016,1024,1030,1035,1036,1040,1054,1056,1074,1076,1080,1088,1100,1101,1125$, 1136, 1200, 1237, 1250, 1257, 1270, 1280, 1300, 1314, 1332, 1333, 1390, 1400, 1414, 1427, 1440, 1484, 1500, 1562, 1570, 1596, 1600, 1650, 1666, 1718, 1745, 1774, 1800, 1840*, 1850, 1855, 1875, 1894, 1920, 1952, 1968, 1979, 1995, 2000, 2048, 2080, 2094, 2100, 2160, 2164, 2199, 2200, 2250, 2356, 2400, 2485, $2500,2514,2519,2540,3000,3125,3600,4000,4096,5000$

* $A B$ or $A B C$ output only. Note: Resolutions up to 72,000 are available

Figure 1 Output Waveform

## Notes

1. Mounting is usually done either using the D -style square flange mount, E - or G -style servo mounts, or one of the standard face mounts, F1 for example. Consult factory for additional face mount options.
2.The shaft seal is recommended in virtually all installations. The most common exceptions are applications requiring a very low starting torque or those requiring operation at both high temperature and high speed.
2. Non-standard index widths and multiple indices are available by special order Consult factory.
3. Complementary outputs are recommended for use with line driver type (source/ sink) outputs. When used with differential receivers, this combination provides a high degree of noise immunity.
4. Output IC's: Output IC's are available as either Line Driver (LD) or NPN Open Collector ( $O C$ ) types. Open Collectors require pull-up resistors, resulting in higher output source impedance (sink impedance is similar to that of line drivers). In general, use of a Line Driver style output is recommended. Line Drivers source or sink current and their lower impedance mean better noise immunity and faster switching times. Warning: Do not connect any line driver outputs directly to circuit common/OV, which may damage the driver. Unused outputs should be isolated and left floating. Our applications specialists would be pleased to discuss your system requirements and the compatibility of your receiving electronics with Line Driver type outputs.
28V/V: Multi-voltage Line Driver ( $7272^{*}$ ): 100 mA source/sink. Input voltage 5 to 28 VDC $+/-5 \%$ standard (Note: $\mathrm{V}_{\text {out }}=\mathrm{V}_{\text {in }}$ ). This driver is TL compatible when used with 5 volt supply. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 120 mA typical (plus load current). This is the recommended replacement for 3904R and 7406R open collector outputs with internal pullup resistors. It is also a direct replacement for any 4469, 88C30, 8830 or 26LS31 line driver 28V/5: Multi-voltage Line Driver ( $7272^{*}$ ): 100 mA source/sink. Input voltage 5 to 28 VDC +/- $5 \%$ standard, internally regulated with 5 V (TLL compatible) logic out. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 90 mA typical (plus load current). Note: Limit encoder load to 2.5 W max at ambient. Example at $12 \mathrm{VDC}: 2.5 \mathrm{~W} /(+12 \mathrm{VDC}$ minus $+5 \mathrm{VDC})=357 \mathrm{~mA}$ total allowed current. Consult factory for your specific requirements.
15V/V: Multi-voltage Line Driver (4469*): 100 mA source/sink. Input voltage 5 to 15 VDC $+/-5 \%$ standard (Note: $V_{\text {out }}=V_{\text {in }}$ ). TL compatible when used with 5 volt supply. Supply lines are protected against overvoltage to 60 volts and reverse voltage. Outputs are short circuit protected for one minute. Supply current is 90 mA typical (plus load current). This is a direct replacement for the 4469 Line Driver. 28V/OC: NPN Open Collector (3904*, 7273*). Current sink of 80 mA max. Current sourced by external pull- up resistor. Output can be pulled up to voltage other than supply voltage ( 30 V max). Input voltage 5 to 28 VDC + - $5 \%$ standard. Supply current is 120 mA typical. This replaces prior IC's with designations of 3904, 7406, 3302, 681 and 689. 5V/0CR, 15V/OCR, 24V/ OCR: Open Collector ( $3904 \mathrm{R}^{\star}, 7406 \mathrm{R}^{\star}, 7273 \mathrm{R}^{\star}$ ): Current sink of 70 mA max. Includes internal pull-ups sized at approximately 100 ohms/volt. Max current source is 10 mA . Supply current is 100 mA typical, 120 mA with internal pullups. The 5V/OCR, 15V/OCR and 24V/OCR are often replaced by the $28 \mathrm{~V} / \mathrm{N}$ in system upgrades. 3904, 3904R, 4469, 5V/V, 5V/0C, 5V/OCR, 9V/OC: Intrinsically safe line driver and open collector outputs. These drivers are specific to intrinsically safe encoders, and are installed per the appropriate control drawings listed in Table 2.on this page.
5. Special -S at the end of the model number is used to define a variety of non-standard features such as special shaft lengths, voltage options, or special testing. Please consult the factory to discuss your special requirements. 7. Higher frequency response may be available. Please consult with the factory 8. Extended temperature ratings are available in the following ranges: -40 to $70^{\circ} \mathrm{C},-40$ to $85^{\circ} \mathrm{C},-20$ to $105^{\circ} \mathrm{C}$ and -40 to $105^{\circ} \mathrm{C}$ depending on the particular model. Some models can operate down to
$-55^{\circ} \mathrm{C}$. Extended temperature ranges can affect other performance factors. Consult with factory for more specific information.
6. Mating straight plug receptacles may be ordered from the factory: For M12 use MS3116F12-10S, For M14 use MS3106F14S-6S For M14/19 use MS3116J14-19S, For M16 use MS3106F16S-1S For M18 use MS3106F18-1S, For M20 use MS3106F20-29S
