## SAFETY RATED FLEXMOUNTS

 Flexmounts are specially designed to work with Hollow Shaft versions of the SIL 3 safety encoders. Do not attempt to replace with any other mount that is not certified for this use. When ordered as part of the model number (DX\*\* for the DS05 and DW\*\* for the DSU9) they will come installed on the encoders.

Sensata

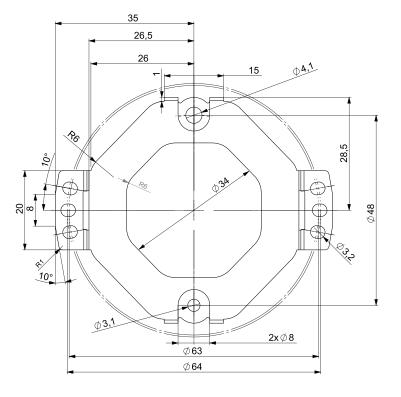

**Technologies** 

 Flexmounts can also be ordered separately as kits that include the mounting hardware. Use the part numbers as indicated in the above drawings: M9445/044 for the DS05 and M9445/045 for the DSU9
