Remarks

All parameters are specified at 24 V, 12.5 A, 230 V AC, 25°C ambient and after a 5 minutes run-in time unless otherwise noted.

For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
