**Remarks**

EMC: External protection circuit required, see instruction for EMC protection circuit 825345.  
 Values referenced to axial approach of St 37 target. For other materials correction factors are applied.  
 The specified parameters apply to the temperature range of +10...+60 °C. Function is also guaranteed in the ranges -10...+10 °C and +60...+70 °C.  
 For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
