Remarks

The sensor is functional again after the overload has been eliminated.
 Quasi-flushed: See installation instructions for inductive sensors with extended range 825356.
 EMC: For operating conditions with noise sources
 External protection circuit is required. Document 825345.
 For more information about MTTF and B10d see MTTF / B10d Certificate

Indication of the MTTF- / B10d value does not represent a binding composition and/or life expectancy assurance; these are simply experiential values with no warranty implications. These declared values also do not extend the expiration period for defect claims or affect it in any way.
