Notes	
<p>The centre of the misalignment between the P0 actuator and the switch add up to 3<sub>-0,4</sub> mm.  The electrical data apply to the P0 actuator.  Do not use switch as end stop.</p> <p>Door switch to be used in elevator doors.</p> <p>The switch must be so installed that the current-carrying metal parts can not be touched directly by hand!  The cable entry must be covered by additional measures at the installation site.</p>
