Radio interference suppression filter, single-phase **HLE 110-230/30**

Standards

Radio interference suppression filter to DIN EN 60939-2

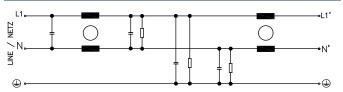

Advantages

- For enhanced requirements Single-stage filter concept
- Single stage men concept
- Efficient filter effect against line-bound interference emissions
- Increase in the interference immunity of the connected consumer

Applications

Radio interference suppression filter for line-side interference suppression of single devices, frequency converters or as group interference suppression.

Sample application

Approvals

Radio interference suppression filter, single-phase **HLE 110-230/30**
