

# Wallplates and Covers

## Metal Wallplates and Extra Duty Metallic While-In-Use Covers

*Note: All metal wallplates (except brass) are packaged with a white protective film, which protects the wallplate during installation and is easily peeled off.*

### Stainless Steel

Provide solutions for a variety of industrial and commercial applications.

- Environments subjected to heavy abuse.
- The 302/304 type stainless steel wallplates are ideal for highly corrosive environments such as food processing, hospitals, static free requirements and more.  
Non-magnetic: 18.0% Chromium  
8.0% Nickel
- The 430 type stainless steel wallplates are aesthetically identical to the 302/304 type stainless steel wallplates and are best suited for environments where corrosion resistance is less critical.  
Magnetic: 17.0% Chromium  
Less than 0.5% Nickel

### Smooth Solid Brass

- Provides a push appearance with the durability of metal.
- Finish is lacquer coated to inhibit oxidation.

### Anodized Aluminum

- Non-magnetic and corrosion resistance for a wide range of applications.
- Finish is lacquer coated to inhibit oxidation.

### Extra Duty Metallic While-in-Use Covers

These covers are designed for use whenever protection is required while an outlet is in use. Covers meet or exceed the extra duty rating per UL 514D, and are NEMA 3R rated.

- Die-cast aluminum construction
- Powder coated “chip resistant” paint corrosion protection
- Unique plug management provision for securing device and cord

### 2014 National Electrical Code (NEC®) Requirement

#### 406.9 Receptacles in Damp or Wet Locations

(B) Wet Locations.

(1) 15 and 20 ampere receptacles in a wet location. 15 and 20 ampere, 125 and 250 volt receptacles installed in a wet location shall have an enclosure that is weatherproof whether or not the attachment plug cap is inserted. An outlet box hood installed for this purpose shall be listed, and shall be identified as “extra duty.” All 15 and 20 ampere, 125 and 250 volt nonlocking-type receptacles shall be listed weather resistant type.

Exception: 15 and 20 ampere, 125 through 250 volt receptacles installed in a wet location and subject to routine high-pressure spray washing shall be permitted to have an enclosure that is weatherproof when the attachment plug is removed.

(2) Other receptacles. All other receptacles installed in a wet location shall comply with (B)(2)(a) or (B)(2)(b).

(a) A receptacle installed in a wet location, where the product intended to be plugged into it is not attended while in use, shall have an enclosure that is weatherproof with the attachment plug cap inserted or removed.

(b) A receptacle installed in a wet location where the product intended to be plugged into it will be attended while in use (e.g., portable tools) shall have an enclosure that is weatherproof when the attachment plug is removed.
