

BS88 Joint Service Fuse Links

Ferrule type fuses 0.25 to 15 Amp 440V ac
Body Size '0'

Time-Current Characteristic Curves

The range of Joint Service Fuse Links was originally developed for the Admiralty, but is now classified under the N.A.T.O. Reference system, Ref. Number 5920.99. The fuse links have been type approved and include short circuit tests to BS88, at 440 volts 33kA. The complete Joint Service range has been entered by Lloyd's Register of Shipping in their schedule 'A' cartridge fuses for use in all types of ships. Whilst intended for use by the Services, the fuse links are also suitable for normal industrial applications, being especially useful wherever space is at a premium, e.g. In the electronic, aeronautical and allied industries.

Dimensional Data (mm)

Fuse Type and Catalogue Number	Rating Amps	I ² t (Amp ² Seconds)		Nom. Watts Loss
		Pre-Arcing	Total at 440V	
059-0107	0.25	0.169	0.337	2.65
059-0108	0.5	0.939	1.88	1.11
059-0109	1	1.66	3.33	1.7
059-0110	2	5.26	10.5	3.15
059-0111	3	20.2	40.4	2.88
059-0112	5	49.3	148	2.02
059-0113	7	84.1	252	2.42
011-9925	10	135	404	3.7
011-9926	15	539	1,620	4.71

Packaging - 100 per carton standard, also available 10 to a pack - add 10 as a suffix to the reference number.

This bulletin is intended to clearly present comprehensive product data and provide technical information that will help the end user with design applications. Bussmann reserves the right, without notice, to change design or construction of any products and to discontinue or limit distribution of any products. Bussmann also reserves the right to change or update, without notice, any technical information contained in this bulletin. Once a product has been selected, it should be tested by the user in all possible applications.
