MAX*VU*

MAX*VU*

The new MAX*VU* is a cost effective temperature controller which is fast to configure, has improved display visibility and reduces costs by minimizing wiring and panel space.

At-a-Glance

Save Valuable Time - Set-Up in Under 60 Seconds

MAX*VU* has been specially designed for ease of use with a basic setup menu accessed from the front keypad.

• Includes 10 most common parameter settings
• Set-up in less than 60 sec for many applications
• Advanced set-up menu can also be accessed when needed

Alternatively fast configuration of multiple instruments can be achieved with the easy-to-use MAX*VU* PC Software.

### Improve Process Monitoring with a High Visibility Display

The high visibility display provides increased clarity and enables vital process information and alarm messages to be viewed at a glance, even from a distance.

MAX*VU's* impressive large digits create the largest active display area for any 1/16DIN (48x48mm) controller and is equally impressive on the larger 1/8DIN version (96 x48mm).
