Features

Efficient Heat Transfer is provided by high quality nickel chromium resistor wire wound on a selected mica strip and enclosed in a die-formed aluminum coated steel sheath.

Long-Term Durability is assured by non-hygroscopic mica insulation.

Uniform Fit to $\pm 1/16"$ because of low expansion stainless steel clamping band, which assures maximum heat distribution.

Easy to Apply due to two-piece construction. Each heater is rated 240V. Connect in series for 480V; parallel for 240V.

Heavy Duty Nickel Plated Steel Post Terminals complete with hardware, are designed to prevent excess torsion during tightening of connections. Standard #10-24 threads.

Reliable Performance and Quick Temperature Response.
