

Model AFS-227

Open-Mounted Air Pressure Sensing Switch with Adjustable Set Point

APPLICATION

The model AFS-227 Air Pressure Sensing Switch is a general purpose proving switch designed for HVAC and Energy Management applications. AFS-227 can be used to sense positive, negative, or differential air pressure.

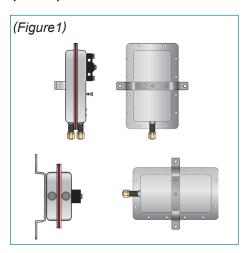

DESCRIPTION & OPERATION

The plated housing contains a diaphragm, a calibration spring and a snap-acting SPDT switch. The sample connections located on each side of the diaphragm accept ¼" OD metallic tubing via the integral compression ferrule and nut.

MOUNTING (FIG. 1)

Select a mounting location that is free from vibration. The **AFS-227** must be mounted with the diaphragm in any vertical plane in order to obtain the lowest specified operating set point. Do not mount with the sample line connections in the "up" position. Surface mount via the two ¾6" diameter holes in the integral mounting bracket. The mounting holes are 3-½" apart.

AIR SAMPLING CONNECTION (FIG.2)

The AFS-227 is designed to accept firm-wall sample lines of 1/4"OD tubing by means of ferrule and nut compression connections. For lines up to 10 feet in length, 1/4" OD tubing is acceptable. For lines up to 20 feet, use 1/4" ID tubing. For lines up to 60 feet, use 1/2" ID tubing. A 1/4"OD adapter, suitable for slip-on flexible tubing, is available: order part number 18311. Locate the sampling probe a minimum of 1.5 duct diameters downstream from the air source. Install the sampling probe as close to the center of the airstream as possible. Refer to Figure 2 to identify the high pressure inlet (H) and the low pressure inlet (L). Select from the five application options listed below, and connect the sample lines as shown.

POSITIVE PRESSURE ONLY: Connect the sample line to inlet **H**; inlet **L** remains open to the atmosphere.

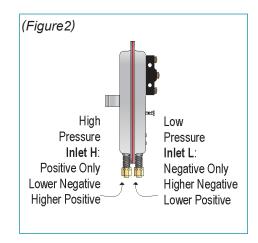

NEGATIVE PRESSURE ONLY: Connect the sample line to inlet L; inlet **H** remains open to the atmosphere.

TWO NEGATIVE SAMPLES: Connect the higher negative sample to inlet **L**. Connect the lower negative sample to inlet **H**.

TWO POSITIVE SAMPLES: Connect the higher positive sample to inlet **H**. Connect the lower positive sample to inlet **L**.

ONE POSITIVE & ONE NEGATIVE SAM-PLE: Connect the positive sample to inlet H. Connect the negative sample to inlet L.

ELECTRICAL CONNECTIONS (FIG.3)

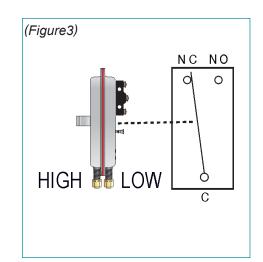

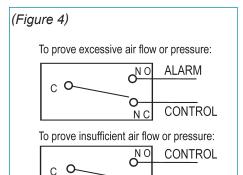

Before pressure is applied to the diaphragm, the switch contacts will be in the normally closed (NC) position. The snap switch has ½" 90° quick connect spade terminals. Wire alarm and control applications as shown in **Fig.4**.

FIELD ADJUSTMENT

The adjustment range of an AFS-227 Air Switch is $0.05\pm.02$ " w.c. to 12.0" w.c. To adjust the set point, turn the adjusting screw counterclockwise until motion has stopped. Next, turn the adjusting screw 4 complete turns in a clockwise direction to engage the spring. From this point, the next ten turns will be used for the actual calibration. Each full turn represents approximately 1.2" w.c.

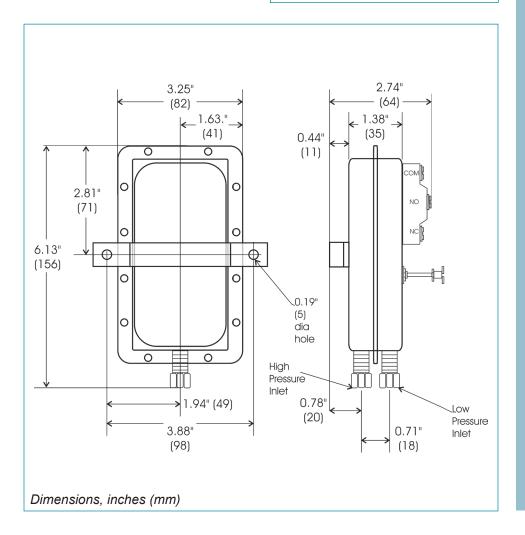

Please note: To properly calibrate an air switch, a digital manometer or other measuring device should be used to confirm the actual set point.

SPECIFICATIONS

MODEL AFS-227 AIR FLOW PRESSURE SENSING SWITCH WITH ADJUSTABLE SET POINT

Mounting Position: Mount with the diaphragm in any vertical plane.

Set Point Range: $0.05" \pm 0.02"$ w.c. to

12.0"w.c.

Field Adjustable "Operate Range": 0.07"w.c. to 12.0" w.c.

Field Adjustable "Release Range": 0.04"w.c. to 11.2" w.c.

Approximate Switching Differential:

Progressive, increasing from 0.02± 0.01" w.c. at minimum set point to approximately 0.8" w.c. at maximum set point.

Measured Media: Air, or combustion byproducts that will not degrade silicone.

Maximum Pressure: 1/2 psi

(0.03 bar)

Operating Temperature Range:

-40 °F to 180 °F (-40 to 82 °C)

Life: 100,000 cycles minimum at ½ psi maximum pressure each cycle and at maximum rated electrical load.

Electrical Rating:

300 VA pilot duty at 115 to 277 VAC, 15 amps noninductive to 277 VAC, 10 ma at 5 VDC (applies to dry circuit

applications).

Contact Arrangement: SPDT

Electrical Connections: Gold, ½" 90° quick-connect spade terminals.

Sample Line Connectors: Male, externally threaded 1/16" 24 UNS 2A thread, complete with nuts and self-aligning ferrules.

Sample Line Connections: Connectors accept 1/4" OD rigid or semi-rigid tubing.

Approval: UL, FM, CSA **Shipping Weight:** 1.2 lbs.

Accessories

- · Sample line probes.
- Orifice plugs (pulsation dampers).

MODEL SUFFIX

ANY CLEVELAND CONTROLS AIR FLOW SENSING SWITCH CAN BE ORDERED IN "KIT" FORMAT.

A kit consists of a specific model air switch and a set of components to install it in most standard applications. Kits are packaged in compact chipboard boxes designed for the contractor's convenience. Each box is specifically labeled. Custom label requirements (such as barcoding, proprietary part numbers and logos) can be provided.

To order a kit, add the suffix "-121" to any Cleveland Controls model number.

POSSIBLE CHOICES INCLUDE (FROM TOP LEFT, **CLOCKWISE):**

- · AFS-222 Adjustable General Purpose Switch
- AFS-460, Adjustable Switch with Manual Reset Button
- PAS-2100 Pneumatic Switch

Ask for product bulletins for these or any other models of interest.

KITS ARE PACKAGED IN INDIVIDUALLY LABELED **CARTONS CONTAINING:**

- 1 air switch (specify required model number).
- 1 piece P/N 18311-121 Tube Kit consisting of 2 pieces aluminum adapter tube with 2 pcs. P/N 27577-037 mounting screw.
- 1 piece P/N 18647 Poly Tube, 6" lenath.
- 1 descriptive bulletin (appropriate literature for the selected switch model).
- 1 chipboard box; dimensions are: $4^{-11/16}$ " x $3^{-3/4}$ " x $6^{-7/16}$ ".
