

A photograph of a Ruff-IN pre-fab system. It features two vertical metal rails with diamond-shaped patterns. A horizontal metal bar is mounted between the rails, secured with brackets. A vertical metal rod runs through the center of the horizontal bar. At the bottom of the rod, there is a rectangular metal enclosure with a circular opening. The background is a solid blue color.

Telescoping brackets

- Completely adjustable, fits a range of stud spacing
- Mounts 1½", 2⅛", 2½", and 2⅜" deep boxes
- Increased rigidity through center groove design
- Only two screws required to mount 1½" and 2⅛" box depths
- Pre-punched screw holes provide for easy box installation
- Bar is marked with a scale for stud spacing
- Finish: Pre-galvanized

Floor mount box supports

- BBF floorstand provides the most rigid support in the industry
- Far-side support accommodates 6", 5½", 3⅝", and 2½" stud depths
- Fold-out tab built-in to attach floor stand to stud if desired
- Integral "wings" provide rigid support when floorstand is mounted between studs
- Optional cable containment clip securely attaches to floorstand without hardware
- Patented Marty Mouse™ ears enable boxes to be secured with or without the plaster rings
- Finish: Pre-galvanized

Double sided box support bracket

- Double sided box support designed for pre-fab installations.
- Unit can be installed on either side of stud with repositioning box or devices
- Patented Marty-Mouse™ ears feature an innovative keyhole pattern to secure outlet box to bracket with or without plaster ring
- Marty-Mouse ears simplify wiring of pre-fab units. Plaster ring can be removed for full access to box contents while box remains in place
- Wider box opening accommodates one or two gang adjustable plaster rings (B1AJ & B2AJ - see pg. 19)
- Enhanced far-side support stands up during drywall installation and outperforms competitor brackets
- Finish: Pre-galvanized

Firestop pads

- SpecSeal® power shield electrical box inserts are used to protect an electrical box and maintain fire-resistance ratings of wall assemblies when the horizontal separation between metallic boxes on opposite sides of the wall is less than 24"
- The intumescent insert is designed to install inside the box, directly against the back wall
- SpecSeal® power shield expands a minimum of 24 times its original size, when exposed to high temperatures or flames, to quickly seal off the passage of fire and smoke
- Simple to install. SpecSeal® power shields are sized to fit typical outlet boxes and feature an adhesive strip on the back of the pad to ensure adhesion to the back of the electrical box. Installs quickly with no mess/residue
- The low profile design maximizes the area inside the electrical box
- Water resistant - no soluble or hygroscopic ingredients

Metal protector plates

- Protects box contents from drywall mud, paint and debris
- Protector plates provided with all wiring device assemblies
- Can be installed on plaster rings with or without pre-installed wiring devices
- Helps protect pre-installed wiring devices from damage during drywall installation
- Design transmits force of drywall installation to the plaster ring - not the wiring device
- Domed plate for toggle switches allows for clearance between the plate and switch, and helps eliminate scratching of the devices
- Two protector plates are required for two device plaster rings
