3A Signals & Alarms

## Application:

- W2H series signaling devices are used:
- as independent audible signal or warning devices
  - in Class I, Division 2, Groups A,B,C,D hazardous areas where flammable vapors or gases may be present due to accidental or abnormal operation
  - in Class II, Division 2, Group G hazardous areas where combustible dusts may be present due to accidental or abnormal operation

## Features:

- The W2H is solid-state, compact, rugged but lightweight. The system is programmable, which allows the convenience of tone selection, without the need for separate tone modules. Each unit can be programmed for any one of four different tones (whoop, wail, hi-lo and horn), by wiring to the corresponding terminal on the unit's terminal strip. Separate sound modules not required.
- Unit may be field wired for multiple signal selection by manual or automatic control.
- 180° speaker rotation allows flexibility in direction of sound
- Corrosion-resistant conformal coating protects the printed circuit and other interior components.

## Standard Materials:

- Body – die-cast aluminum
- Projector – spun aluminum
- Hardware – stainless steel

## Standard Finishes:

- Body and projector – gray hammertone enamel
