## WIRE MESH GRIPS FOR LIQUIDTIGHT METALLIC CONDUIT FITTINGS

### Application:

Wire mesh grips are used with Liquidator liquidtight conduit fittings to prevent conduit pullout due to stress, tension, strain, vibration, or movement. Typical applications include the wiring of machine tools, motors, transformers, food processing, equipment, robotics, or any application that requires a flexible liquidtight conduit connection.

## LiQuik™ LIQUIDTIGHT FITTINGS

No disassembly required! The LiQuik liquidtight fittings are quick and easy to install in 2 steps, offering huge labor saving potential. Available in trade sizes 3/8"–2" straight insulated.

### New LiQuik Assembly Installation

1. Slide conduit inside the fully assembled connector.

2. Turn the connector assembly or the conduit until the ferrule threads engage the spirals in the conduit. The pins in the ferrule are locked inside the holes in the connector body, preventing the ferrule from turning. Tighten the nut against the connector.
