Application:

ETH horn signals are used:

- for call signals, alarms, and various other signalling applications
- in specific hazardous atmospheres as found in chemical plants, oil and gas refineries, bulk loading stations, paint and varnish manufacturing plants, grain processing industries and grain elevators, as well as in certain metal, coal, combustible fiber processing or handling areas
- in conduit systems and mounted on a flat surface with the projectors aimed in the desired direction

Features:

- No external conduit seal is required.
- The ac signals do not have arcing contacts.
- The dc horns have factory sealed wire leads in the interconnecting nipple and hub.
- The body cover joint of ac horn signals is of serrated construction, machined to close tolerance to ensure flametightness and secured by a clamping ring. The DC unit has a ground joint design.

Standard Materials:

- Copper-free aluminum

Standard Finishes:

- Natural

Size Ranges:

- Hub – ½" or ¾" size

Sound Levels:

- See page 557 for individual ratings

Electrical Rating Ranges:

- Nominal voltage –
24, 115, 230 VAC
24 VDC

See Table 1 for more complete ratings
