Explosionproof VFDs are highly flexible AC drives designed specifically for hazardous area locations. These drives can be mounted next to the motor in the classified area, providing significant installation cost savings – along with the traditional VFD benefits of energy savings, speed and torque control, and system diagnostics.

This revolutionary product features a NEMA 7 enclosure with patent pending active cooling technology, allowing a traditional VFD to be housed inside the classified enclosure without the risk of overheating. The ACE explosionproof VFD is rated Class I, Divisions 1 & 2 for use in the most extreme environments, and is designed to match the high requirements of pumps, compressors, fans, separators and mixers in the following process industries:

- Oil and gas/refineries
- OEM skid builders
- Petrochemical
- Water/wastewater
- Pharmaceutical
- Food and beverage manufacturing

Applications:

- For speed control of pumps, compressors, fans, conveyors, separators, mixers and other process equipment
- Designed to meet the high reliability and safety requirements of process industries such as oil and gas, chemical and mining

Features:

- ACE VFDs are installed 'on-machine' inside the hazardous areas, eliminating expensive, complicated installations
- There is no need to run long lines of conduit and motor cable, dig up roadways and sidewalks, navigate around obstacles and hazards or build off-site control rooms in non-hazardous areas to house VFD clusters
- Reflected Wave Syndrome is eliminated due to short motor cable runs

ACE DG1 features:

- Drives available up to 100 HP
- Improved temperature rating:
 - 30°C to +50°C (up to 75 HP)
 - 30°C to +40°C (100 HP)
- Standard features include:
 - EtherNet/IP
 - Modbus TCP
 - RS-485: Modbus RTU
 - BACnet MS/TP

Certifications and compliances:

UL classified:

- Class I, Divisions 1 & 2, Groups B, C, D

cUL classified:

- Class I, Divisions 1 & 2, Groups B^A, C, D

UL standard:

- UL1203

Environmental ratings:

- NEMA 3, 4X^B, 7BCD
- Raintight
- Wet locations

Operating temperature range:

- 1 to 75 HP: -30°C to +50°C (-22°F to 122°F)
- 100 HP: -30°C to +40°C (-22°F to 104°F)

Standard materials and finishes:

- Body and cover – copper-free aluminum, epoxy powder coated
- Operating handle – copper-free aluminum, epoxy painted
- Window – tempered soda lime glass
- Blower – aluminum, natural
- Filters – stainless steel, natural
- Pre-filters – stainless steel, natural
- Disconnect – stainless steel, natural
- Shroud – copper-free aluminum, epoxy painted
- Cover hinges, bolts, washers and springs – stainless steel, natural
- Internal brackets – stainless steel, natural
- Manifold and intake – EPDM rubber, natural

Horsepower ratings:

- Available from 1 to 100 HP

VFD system specifications:

- Eaton PowerXL DG1 general purpose drives

Shroud covering top filters allows water to dissipate off enclosure.

Stainless steel, captive, triple lead quick release spring loaded bolts install faster and provide clear indication that the cover bolts are fully retracted from the body.

Stainless steel hinges provide convenient and easy access to enclosure interior.

Enclosure epoxy painted for superior corrosion resistance.

Explosionproof window allows for viewing of the VFD interface module LCD screen.

Internal and external grounding lugs.

Explosionproof pilot lights provide run, stop and alarm indication.

Filters[Ⓕ] in top and bottom of enclosure allow airflow into and out of the enclosure, cooling the VFD and eliminating risk of overheating.

Pre-filter screens[Ⓖ] (not shown) eliminate clogging of the primary filters, ensuring reliable and consistent airflow. Pre-filter screens can be easily removed and cleaned without shutting down operations.

ACE-DG1-60 Eaton PowerXL VFD with 60 HP rating

Options (see below)

CC CAN open

PT Potentiometer

Modbus and Ethernet standard on all DG1 models

Options

Communication modules

Suffix	Description
CP	Profibus
CD	Devicenet
CC	CAN open
CS	SmartWire
CL	Lon works
RO	Relay output
DI ⁵	6 x DI 240 VAC input option card
DIO	3 x DI, 3 x DO, 24 VDC

Potentiometer

Suffix	Description
PT	AB 800H-UP29

Local / remote

Suffix	Description
LR	Two-position switch

600 VAC option

Suffix	Description
600	600 VAC

Note: 600 suffix option can only be used for ACE-DG1 units with nominal HP of 5 or less.

Replacement part kits

Cat. #	Description
ACE KIT 1	Pre-filter and hardware (one-piece)
ACE KIT 2	Filter assembly (one-piece)
ACE KIT 3	Blower, manifold and hardware (one-piece)
ACE KIT 7	3/8" glass window
ACE KIT 8	5/8" glass window
ACE KIT 9	Shroud replacement kit

Drive fan replacement kits

Cat. #	For use with
ACE KIT 11-1	ACE-DG1 1-5 HP
ACE KIT 11-2	ACE-DG1 7-15 HP
ACE KIT 11-3	ACE-DG1 20-30 HP
ACE KIT 11-4	ACE-DG1 40-60 HP
ACE KIT 11-5	ACE-DG1 75-100 HP

Note: This fan is not the main blower found inside the enclosure. ACE KIT 3 is the replacement parts kit for the main blower. ACE KIT 11 kits are replacement fans specifically for the VFD drive.

⁵ 5 HP and below listed for Group B.

^N Please consult factory.

^{DI} DI option does not denote a 240 VAC supply voltage capability of the VFD. Please contact factory if a 240 VAC VFD is required.
