The Cutler-Hammer ${ }^{\circledR}$ E51 Inductive Proximity Sensor Family from Eaton's electrical business combines high performance with a familiar limit switch style housing. Modular, plugin components provide application flexibility, ease of maintenance, less downtime and reduced inventory. Choose from 2-wire sensors with AC/DC operation, or 4-wire sensors in either AC or DC styles. Connection options include terminal, miniconnector or various lengths of cable.

Choose from standard sensors that detect all types of metallic targets. The next page provides more detail on these sensors.

## Approvals

- UL Listed
- CSA Certified
( $\boldsymbol{\epsilon}$ (where shown)

Unless otherwise noted, the products contained in this document are not designed or intended for use in human safety applications.

## This Rugged Sensor Family Features Modular Components for Versatile Sensing

## Product Features

- Rugged construction is ideal for industrial environments

■ Viton ${ }^{\circledR}$ gaskets ensure a positive seal and high resistance to industry chemicals

- Direct replacement for worn out limit switches

■ Sensor heads and bodies feature captive screws to eliminate loss

- All sensor heads include a selector switch to program output function to either N.O. or N.C.
- Sensor bodies feature bifurcated engagement prongs for a reliable connection when plugging into receptacle stabs
■ Engagement key between sensor body and receptacle prevents improper assembly
■ Sensors accommodate both U.S. and DIN mounting dimensions
■ Wiring terminals feature captive pressure plate saddles for \#18 to \#12 AWG wire. A green screw identified ground terminal is also included
■ Logic modules are available to provide additional control functions

## Standard Sensors

Standard E51 sensors feature long sensing ranges and a choice of top or side sensing heads. Alternate frequency units eliminate interference when mounted close to standard frequency units. Order
sensors in component form, as assembled plug-in units, or in a sealed version where the sensor body is factory assembled to an epoxy filled receptacle with tamperproof screws to ensure a lasting seal.
