Wiring Diagrams**XTMR Reversing Contactor Control Circuit****XTMR Reversing Contactor Power Circuit****XT Mini Star-Delta (Wye-Delta) Contactor Power Circuit****Tripping Characteristics****Tripping Characteristics Chart**

These tripping characteristics are mean values of the spread at 20°C ambient temperature in a cold state. Tripping time depends on response current. With devices at operating temperature, the tripping time of the overload relay reduces to approximately 25% of the read off value. Specific characteristics for each individual setting range can be found on **Page V5-T1-33.**
