DRIVE IN A BOX™

ISO 9001:2008 Certified

Drive-In-A-Box™ is an industrial AC motor controller, designed for quick and simple installation and start-up. Only input power and output motor connections, plus a simple motor configuration are required. Choose from many popular options to customize the Drive-In-A-Box™ to fit your application.

Drive-In-A-Box™ Features:

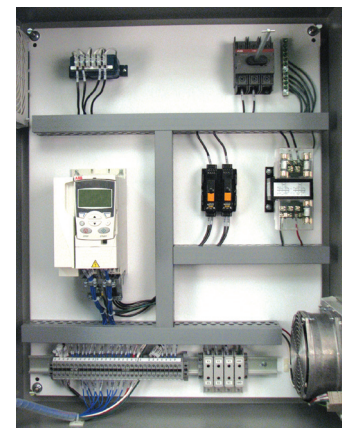

- Fast turnaround: Ships in less than ONE WEEK - compare to 1 month, from the competition!
- Choose your drive brand: ABB ACS355 or Control Techniques Commander SK.
- Easy ordering: Using Galco's website, choose your drive then select from a list of options to build your own Drive-in-A-Box™.
- Quick installation: Just wire motor & wire input power. Terminals are clearly marked and easily accessed.
- Simple startup: Drive is pre-programmed with your Drive-In-A-Box™ options. Enter in your motor data and you are ready to run!
- Indicator and control are installed with engraved legend plates for quick reference.
- Input voltages supported: 240 single phase, 240 three phase, and 480 three phase.

Standard Equipment:

- NEMA 12 Enclosure - 30" X 24" X 10"
- Fingersafe Power Connections
- Filter Fan and Exhaust Filter
- Non-Fusible Disconnect Switch
- Drive Controls I/O Terminals for External Control
