

ELECTRONIC ENCLOSURES

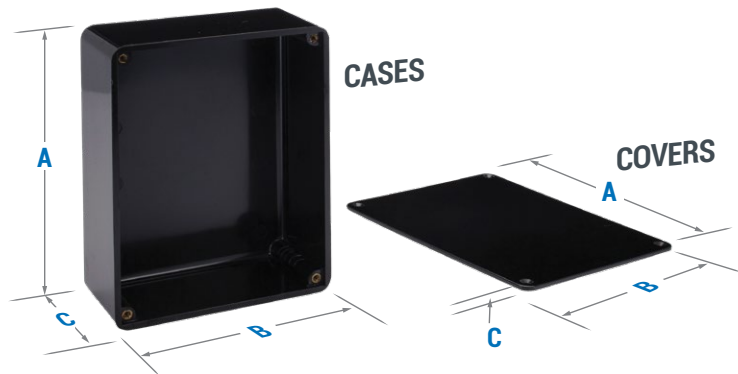

Phenolic and ABS Thermoplastic

ELECTRONIC ENCLOSURES

Davies Molding has been providing electronic enclosures for over 50 years. With offerings including Phenolic and ABS thermoplastic there is sure to be a fit for any of your electronic casing needs. Matching covers sold separately.

Custom cases, sizes and colors are available upon request along with pad printing, drilling, and laser engraving.

PHENOLIC Electronic Enclosures

Plastic electronic enclosures are ideal for high heat requirements up to 475° F. Glossy black general purpose phenolic material provides a high luster finish which is resistant to marks, scratches and most chemicals. Several different cases and case covers are available for a variety of industry uses.

- ▶ Mar and scratch resistant
- ▶ Resistant to most chemicals
- ▶ Heat resistant up to 475 degrees
- ▶ Glossy black - provides a high luster finish
- ▶ Typical wall thickness 0.80"

ABS THERMOPLASTIC Electronic Enclosures

High impact ABS Thermoplastic Cases and Covers are perfect for nearly every challenging industrial and electronic application. Easily machined and will not chip or crack during fabrication. PCB guides make it easy for spacing electric components. Also available in flame-retardant ABS with flammability rating of 94 V-0.

- ▶ High Impact ABS Thermoplastic
- ▶ Easily Machined - Will not chip or crack during fabrication
- ▶ Perfect for industrial and electronic applications
- ▶ Satin black finish
- ▶ Typical wall thickness 0.80"
