Delta Industrial Ethernet

Matched to Maximize

Delta Industrial Ethernet Products and Solutions (IES)

Adapting to the diversity of network communication applications, Delta's IES series industrial Ethernet products and solutions offer an abundant selection with excellent quality in compact and durable designs. From Ethernet switches, IEEE 802.11 wireless communication, mobile wireless communication, serial device servers to protocol gateways, the IES series ensures you precise and stable data transmission among devices. It guarantees a seamless device integration that satisfies critical system applications in industrial environments.

Ethernet Switches

TAIWAN
EXCELLENCE
2014

Tailoring to industrial applications that require highly reliable network systems, Delta's DVS series managed and unmanaged Ethernet switches provide better system performance with functions such as the redundant self-healing ring, high-end layer 2 management, and a wide-operating temperature from -40°C to 75°C. The EMC noise immunity complies with IEC standards and attains a high level 3/4. The intuitive design of the operating interface provides users with easy access and convenience.

Wireless IEEE 802.11

Delta helps users construct a reliable industrial wireless network by the WLAN products compatible with multiple communication protocols, such as IEEE 802.11 a/n in 5GHz or IEEE 802.11 b/g/n in 2.4GHz. Adopting Multiple-input and Multiple-output (MIMO) technology enables the network bandwidth reach 450Mbps. Delta WLAN products support multiple wireless connectors, including wireless access points, WDS, and clients for easy and economical construction of wireless LANs. The built-in 3-in-1 serial ports directly connect to industrial controllers, saving the effort and cost of cable connection. The built-in gateway for MODBUS, the most common industrial communication protocol, converts MODBUS Serial to MODBUS TCP, seamlessly interconnecting the existing equipment with the Ethernet communication network.

Intelligent Transportation System

The Intelligent Transportation System (ITS) integrates advanced electronic, information and sensing technologies for real-time transportation management of pedestrians, roads and traffic. The ITS effectively improves the safety, convenience, and efficiency of transportation, reducing carbon emissions from transportation and its impact on the environment, and supporting economic development.

DVS-110W02-3SFP

7-port FE + 3-port GbE Combo Managed Ethernet Switch

- ▶ GbE fiber port to enhance backbone transmission
- ▶ STP/RSTP/MSTP for network redundancy to ensure network reliability
- ▶ IP40 metal case, -40°C to 75°C operating temperature

DVW-W02W2-E2

IEEE 802.11 a/b/g/n Wireless AP/WDS/Client/Gateway

- ▶ IEEE 802.11n up to 450Mbps data rate
- ▶ Supports 2-port RS-232/422/485 to Ethernet Device Server
- ▶ IP40 metal case, -40°C to 75°C operating temperature

DVS-G008I00A

8-port GbE Unmanaged Ethernet Switch

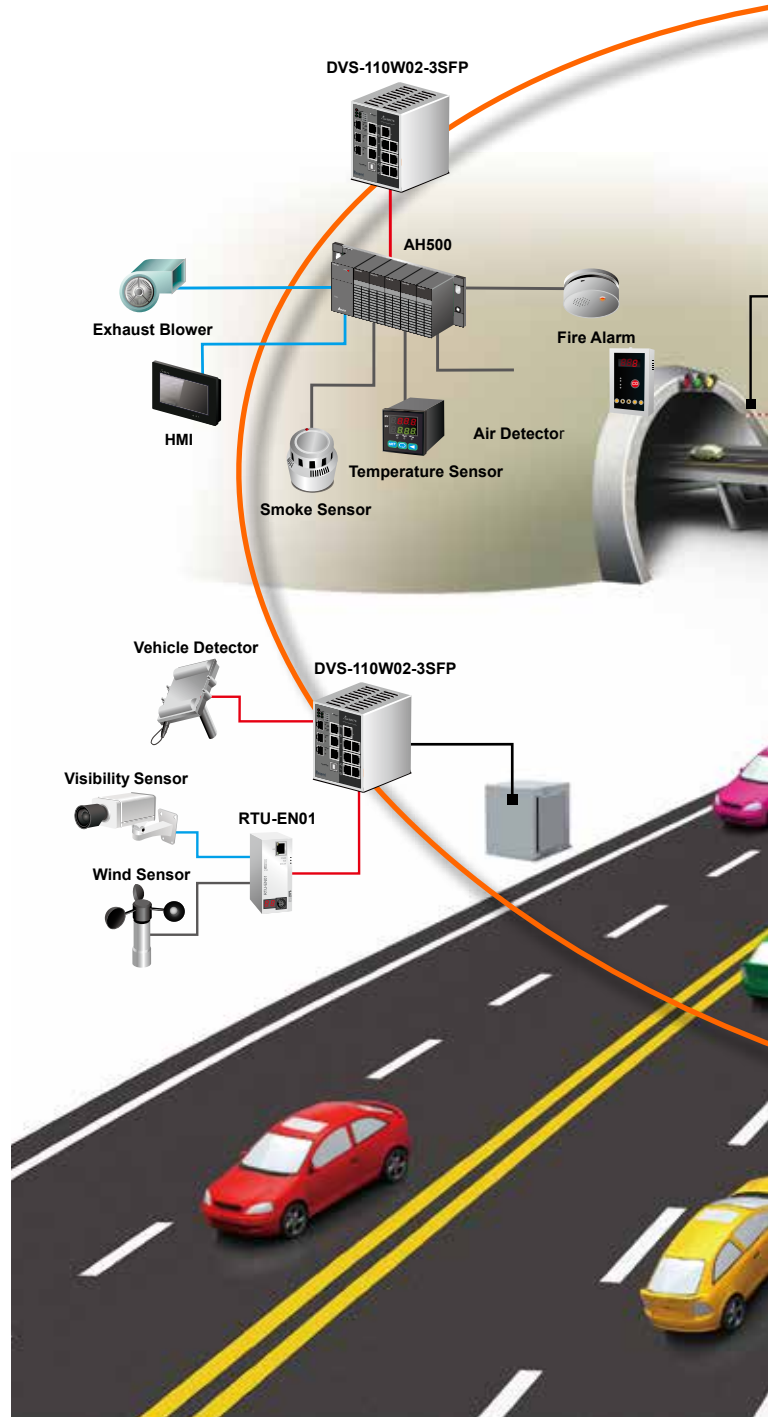

- ▶ Full GbE ports to enhance transmission bandwidth
- ▶ Jumbo frame size up to 9216 Bytes
- ▶ IP40 metal case, -10°C to 60°C operating temperature

Wind Power

Wind power has emerged as an alternative energy solution in recent years. Wind power plants are typically located in remote areas, often within a vast territory. The ring network of fiber optic Ethernet is widely adopted for data transmission and management and real-time monitoring of power generation panels. These plant locations can be harsh and hazardous, with a large diurnal temperature variation. System reliability and transmission precision can only be guaranteed with highly noise-immune and durable network devices.

7-port FE + 3-port GbE Combo Managed Ethernet Switch

- ▶ GbE fiber port to enhance backbone transmission
- ▶ STP/RSTP/MSTP for network redundancy to ensure network reliability
- ▶ IP40 metal case, -40°C to 75°C operating temperature

DVS-016 Series

16-port FE Unmanaged Ethernet Switch

- ▶ Broadcast Storm Protection
- ▶ Auto warning for link-down and power failure by relay output
- ▶ IP40 metal case, -40°C to 75°C operating temperature

RGV Intelligent Warehouse Carriage Automation System

Wireless signal transmission technology can be applied in various areas. Delta's DVW series matches with Leaky Coaxial Cable (LCX or Radiating Cable) to transform Wi-Fi into stable extension signals which can surround objects, walls, pillars, and transmit signals to every corner of the production line, enhancing Ethernet communication accessibility. They also offer high-speed real-time process capability. When applying the Delta DVW series and LCX to Rail Guided Vehicle (RGV) systems, they can assist factory operators carry materials, which enhances working efficiency and security for maintenance personnel.

Solar Power

Governments worldwide actively seek renewable clean energy for their electricity infrastructure in recent years. Solar power systems are one of the main programs. Most solar power plants are located in remote, vast areas of a country. The monitoring system constructed by Industrial Ethernet establishes highly stable and multiple redundant network systems for a power plant. It also facilitates real-time monitoring and continuous production by the highest generating capacity.

DVS-108W02-2SFP

6-port FE + 2-port GbE Combo Managed Ethernet Switch

- ▶ GbE fiber port to enhance backbone transmission
- ▶ ONE RING, ONE CHAIN for rapid network redundancy to ensure network reliability, recovery time less than 20ms
- ▶ IP40 metal case, -40°C to 75°C operating temperature

DVS-G408W01

8-port GbE+ PoE+ Unmanaged Ethernet Switch

- ▶ 8 10/100/1000 Base-T PoE+ (PSE) ports. Based on IEEE 802.3at standard up to 30W per port
- ▶ Auto warning by relay output for power failure
- ▶ IP30 metal case, -40°C to 70°C operating temperature

- ▶ Specific Solar Tracking instruction
- ▶ Program capacity: 16K steps, Data register: 12K words; Higher execution speed, LD:0.64 μs, MOV:2 μs
- ▶ Built-in MODBUS TCP and Ethernet/IP

Automated CNC Production Line

Unmanned factories is the ultimate goal for industrial automation. The logistics of an automated production line is an indispensable part of that goal. The use of robots, unmanned vehicles and other equipment, and data transmission and exchange via an industrial wireless network allows immediate acquisition of the status of the production line from the control room, and significantly increases the overall productivity and quality.

Layer 2 Network Management

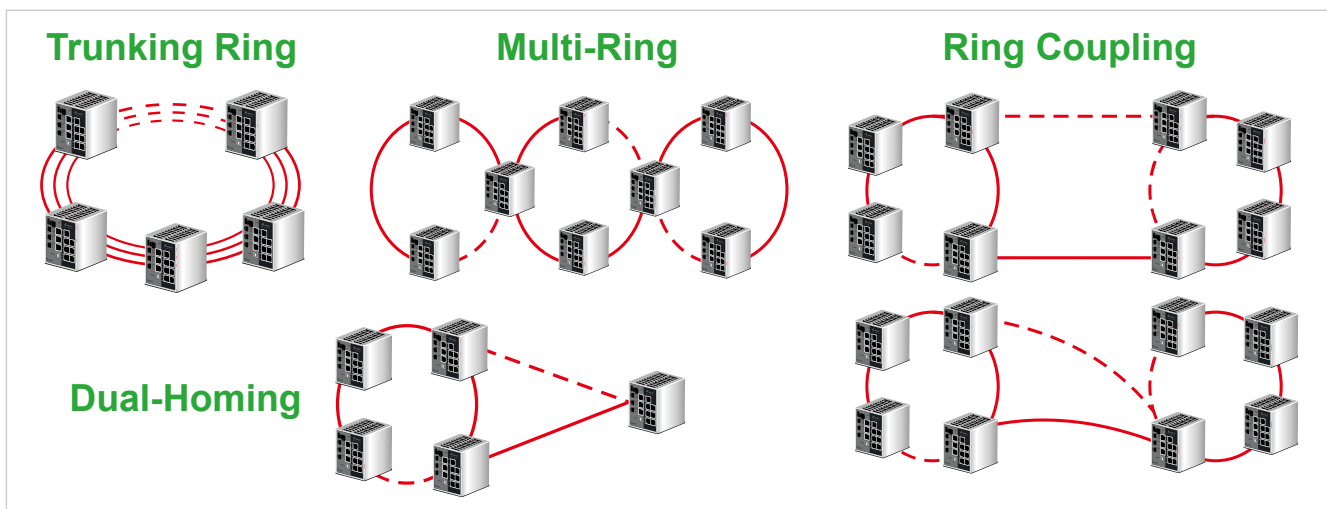

Network Redundancy Technology

IEEE published the 802.1D Spanning Tree Protocol (STP) in 1998, and in 2004 announced 802.1w Rapid Spanning Tree Protocol (RSTP), which is an enhancement to STP. These network protocols are used to construct backup paths for transmission when a link fails and are applied in network structures with demands for high reliability. In current industrial automation and critical system applications, as the high demand for faster convergence time grows, STP and RSTP's speed, whose unit of convergence time is seconds, becomes insufficient. Delta thoroughly understands customers' needs from different industries. To meet the high demand for speed and reliability, Delta introduced ONE RING and ONE CHAIN ultra-speed redundant protocol to satisfy our customers' needs, which provides faster speed and more functions than STP and RSTP.

ONE RING

Network self-healing brings most recovery

Delta's proprietary self-healing redundant ring technology is called ONE RING. ONE RING can enable redundant paths and provide self-healing recovery time of less than 20 milliseconds to ensure fluent data transmission with minimum loss when any nodes fail or meet default in a ring network. In addition, ONE RING offers customers the selection of Trunking Ring, Multi-Ring, Ring Coupling, and Dual-Homing modes to satisfy their specific needs. With strong ring network functions, ONE RING provides highly flexible and highly reliable network structures, which greatly save on wiring cost.

ONE CHAIN

Multi-Network self-healing brings most efficient and trust

Delta's self-healing redundant chain technology is called "ONE CHAIN".

ONE CHAIN is a new generation of Network Redundancy Technology with unlimited expansion functions derived from the design concept of ONE RING.

ONE CHAIN is able to offer backup paths within 20 milliseconds when several network nodes fail at the same time to ensure fluent data transmission with minimum loss. Its high speed self-healing time is especially suitable for high-end automation network structures such as a Distributed Control System (DCS). ONE CHAIN is compatible with other existing large Internet backbone network switches, which saves costs for wiring and for changing new switches such as equipment, labor, and time.

Advanced Network Management

VLAN

A Virtual Local Area Network (VLAN) is a network topology configured according to a logical scheme rather than a physical layout. VLANs allow users to break up switched environments into multiple broadcast domains, and can be used to combine any collection of LAN segments into an autonomous user group that appears as a single LAN. It enhances performance by conserving bandwidth and improves security by limiting traffic to specific domains. VLANs can be created statically by hand and dynamically through GVRP.

Trunking

The physical ports of a switch can be aggregated by a logical scheme into a group which forms a physical link. This link serves as a redundant path which enhances bandwidth and improves performance.

Quality of Service (QoS)

Network packet prioritization is a process which prioritizes the transmission of packets with a queue. It ensures prompt packet scheduling that is especially effective for delay-sensitive packets and audio or image transmissions with optimal quality of service.

Link Layer Discovery Protocol (LLDP)

The LLDP protocol is used by network devices for advertising their identity, capabilities, and any updates to neighboring devices on an IEEE 802.ab network. These messages are stored in SNMP MIB and can be searched through a network management system.

DHCP Relay Option 82 IP Assignment

DHCP Relay Option 82 delivers additional client information such as ports connected, VLAN, as well as MAC addresses to a DHCP server for more flexible IP addresses assignment.

Enhanced Network Security Management

A complete set of security verification tools further ensures network security for users. Multiple protection mechanisms are incorporated in network management to protect it from unauthorized network access during operation.

Simple Network Management Protocol (SNMP)

Delta Managed Ethernet Switches support v1, v2c and v3 versions of SNMP. For users, SNMP Trap messages allow real-time event alarms for authentication failures, cold/warm starts, link-downs, and many more.

MODBUS TCP & EtherNet/IP Manager

Delta Managed Ethernet Switches support MODBUS TCP and EtherNet/IP protocol for easy integration with an on-site industrial network management system. Users can monitor and manage the operational status via the graphical interface of Supervisory Control and Data Acquisition (SCADA) at any time. The consistency of communication protocols helps users save big on equipment management costs.

Smart Functions Well-tailored to Your Needs

Relay Output for Event Alarms

Delta Managed Ethernet Switches have built-in relay output for event alarms. Any occurrence of preset default events and any digital inputs will trigger alarms. With real-time notification, on-site personnel can quickly diagnose and eliminate any incidents.

Digital Inputs

Designed for industrial environments, the DVS series industrial Ethernet switches easily connect to various industrial devices, such as PLCs or sensors. It delivers real-time alarms to users via relay output or email.

Redundant Power Inputs

The design of dual power inputs provides excellent integration with the common dual power supply design of critical systems, or with industrial environments. It secures switches from potential power impact and provides highly-reliable and uninterrupted network transmission.

A Seamless Interconnection

USB Console Interface

A simple USB cable is all you need to carry out network management settings.

Real-time Web Display

A real-time Web display tells users the connection status of each port with indicators on a Web page. With an uninterrupted network connection, users can manage operations in remote places at any time.

SFP DDM

Utilizing the built-in digital diagnostic monitor (DDM) function of the DVS series Industrial Ethernet Switches, users can continuously monitor the current operation status of the Delta SFP fiber transceiver and the transmission quality through a datasheet displayed on the web.

SFP DDM		Temperature		Rx Power		Tx Power	
Port	Status	Current	Alarm	Current	Alarm	Current	Alarm
1/24	Present	-45.0°C	0.0-85.0	3.3V	0.1-3.8	25.2 mW	0.0-45.0
2/24	Present	-45.0°C	0.0-85.0	3.3V	0.1-3.8	25.2 mW	0.0-45.0

Watch Dog Timer

The hardware Watch Dog Timer restores switches from malfunctions caused by any reasons, such as an incorrect network topology or a malicious network attack. It ensures switches work properly in harsh industrial environments.

CPU malfunction = 6 seconds = Auto Reset

Delta IEXplorer Search Tool

IEXplorer provides friendly access to search for all IES products on the network. One simple click calls up the Web page for setting software functions.

- ▶ IPv6 address suitable for larger network and neighbor discovery
- ▶ Automatic IP assignment by DHCP/BootP server for easy network construction
- ▶ DHCP relay option 82 for sending DHCP requests with clients' identities to a DHCP server
- ▶ Port-based DHCP server with IP and MAC binding makes IP maintenance much easier
- ▶ Q-in-Q double VLAN to distinguish multiple VLANs
- ▶ SNMP v1/v2c/v3 facilitates the exchange of management between network devices
- ▶ Supports EtherNet/IP and MODBUS TCP protocols that facilitates the remote management by SCADA and other industrial devices
- ▶ Proprietary ONE RING and ONE CHAIN high end redundancy technology, easy to build multiple ring topology, self-healing recovery time < 20ms
- ▶ STP/RSTP/MSTP for network redundancy further ensures reliability
- ▶ QoS(IEEE 802.1p) and TOS/DSCP for mission-critical applications
- ▶ IEEE 802.1Q VLAN, MAC-based VLAN, IP Subnet-based VLAN, VLAN isolation and GVRP optimize network strategy
- ▶ Enhanced network security with IEEE 802.1X, TACACS+, SSH, HTTPS and SNMP v3
- ▶ IEEE 802.3ad port trunking in parallel to increase the link bandwidth
- ▶ SNTP (simple network time protocol) for network clock synchronization
- ▶ Broadcast/Multicast / Unknown Unicast storm control improves throughput problems
- ▶ Loopback-Detection to avoid broadcast loops, and shutdown the corresponding ports automatically
- ▶ Cable diagnostic provides the mechanism to detect and report potential cabling issues
- ▶ Intelligent Access Control List(ACL)
- ▶ MAC addresses locking function per port blocks unauthorized access
- ▶ USB console interface for easy connection with laptops
- ▶ IGMP Snooping and GMVP prunes multicast traffic
- ▶ RMON groups 1,2,3,9(history, statistics, alarms and events) for enhanced flow management and analysis
- ▶ CPU utilization displays the amount of works the CPU handles
- ▶ Port mirroring for Many-to-One ports online troubleshooting
- ▶ Versatile system file updates by TFTP, HTTPS or HTTP
- ▶ DDM diagnosis function by SFP fiber module
- ▶ Auto warning by email, DI, relay, Syslog & SNMP trap
- ▶ Compatible with various industrial protocols, including EtherNet/IP, Profinet, CC-LINK IE and DNP 3.0

- ▶ Based on IEEE 802.3at standard up to 30Watts per port.
Backwardcompatible with IEEE 802.3af
- ▶ Advanced PoE management and intelligent powered device (PD) class detection
- ▶ IPv6 address suitable for larger network and neighbor discovery
- ▶ Automatic IP assignment by DHCP server for easy network construction
- ▶ DHCP relay option 82 for sending DHCP requests with clients' identities to a DHCP server
- ▶ SNMP v1/v2c/v3 facilitates real-time remote management of network devices
- ▶ Proprietary redundancy RING and redundancy CHAIN high end redundancy technologies, for multiple ring topology. Self-healing recovery time < 30ms
- ▶ IEC 62439-2 MRP (media redundancy protocol) for IEC-based redundant ring topology
- ▶ STP/RSTP/MSTP for network redundancy further ensures reliability
- ▶ QoS (IEEE 802.1p) and TOS/DSCP for mission-critical applications
- ▶ IEEE 802.1Q VLAN, Q-in-Q double VLAN, VLAN isolation and GVRP optimize network strategy
- ▶ Enhanced network security with IEEE 802.1X, TACACS+, SSH, HTTPS and SNMP v3
- ▶ IEEE 802.3ad port trunking in parallel to increase the link bandwidth
- ▶ IEEE 1588v2 PTP (Precision Time Protocol) for precise time synchronization of network
- ▶ Broadcast/multicast/unknown unicast Unicast storm control improves throughput problems
- ▶ Loopback-detection to avoid broadcast loops, and shutdown the corresponding ports automatically
- ▶ Cable diagnostic provides the mechanism to detect and report potential cabling issues
- ▶ Intelligent Access Control List (ACL)
- ▶ MAC addresses filtering function per port blocks unauthorized access
- ▶ IGMP snooping prunes multicast traffic
- ▶ Port mirroring for Many-to-One ports online troubleshooting
- ▶ DDM snooping function by SFP fiber module
- ▶ Auto warning by email, relay, Syslog & SNMP trap
- ▶ Compatible with various industrial protocols, including EtherNet/IP, Profinet, CC-LINK IE and DNP 3.0

IEEE 802.11 WLAN

IEEE 802.11n Technology

The IEEE 802.11n standard is improved with better data rates by Multiple-input and Multiple-output (MIMO) technology. It supports a bandwidth from 20 MHz to 40 MHz that doubles the speed of transmission performance and is compatible with previous IEEE 802.11 a/b/g standards.

Enhanced WLAN Security Management

A complete set of security verification tools ensures the security of WLAN for users. Multiple protection mechanisms protect the network from unauthorized access.

Wi-Fi Multimedia

Quality of Service (QoS) prioritizes activities in queue, providing exceptional quality for wireless transmission, and is particularly effective for multimedia applications and internet calls.

STP/RSTP

Incorrect wiring frequently causes loops that affect network operation. STP/RSTP protects networks from this type of harm and builds a redundancy path which contributes to a highly reliable network system.

Versatile Wireless Spot

Wireless Distribution System (WDS) Point-to-Multipoint Mode

Replacing traditional wired LAN extensions, this mode enables a LAN extension of two or more LANs through wireless connection.

Wireless Distribution System Repeater Mode

Wireless connection is often limited by the effective transmission distance between two ends. The WDS repeater mode extends the transmission distance to overcome this distance limit.

MODBUS Cache

- Speeds up data loading time
- Online real-time monitoring

DVW series switches provide a dynamic and constant communication between equipments. Responses are given in no time when the host requests via Ethernet, which significantly improves the data rates of serial equipments.

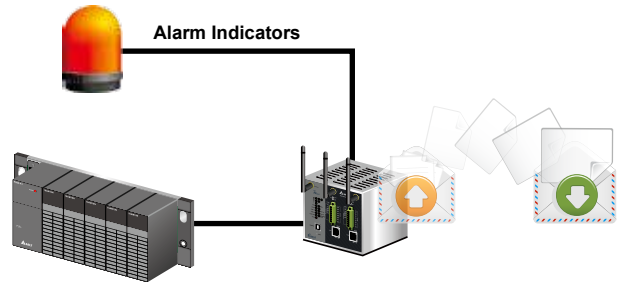

Online Real-time Monitoring

	Station Address	MODBUS (Hex.)	MODBUS (Dec.)	Present Value	Format
1	1	1000	404097	0000	Hex
2	1	1001	404098	0CEF	Hex
3	1	1002	404099	0000	Hex
4	1	1003	404100	0000	Hex
5	1	1004	404101	0000	Hex

Digital Inputs

Designed for industrial environments, the DVW series industrial Ethernet switches easily connect to various industrial devices, such as PLCs or sensors. The DVW series delivers real-time alarms to users via relay output or email.

A Seamless Interconnection

USB Console Interface

A simple USB cable is all you need to make network management settings.

Adjustable Terminal Resistors

For applications that use RS-485, signal reflection in cables often causes interference and poor communication quality. Using adjustable terminal resistors that switch on/off according to requirements improves communication quality.

Introduction to Serial Device Servers

Virtual COM

The virtual COM mode corresponds the serial port of a DVW to the COM port of a PC, providing users with direct access from a PC to serial communication devices via wired or wireless communication.

COM6 = 192.168.1.200:2000

COM5 = 192.168.1.100:1000

TCP Server

In a TCP/IP network, each serial port has one exclusive set of IP address and TCP serial port number. When the host requests connection, a DVW passively receives the request for connection and conducts transmission of serial device data via wired or wireless communication.

TCP Client

In a TCP/IP network, each serial port has one exclusive set of IP address and TCP serial port number. When a DVW receives the data of the serial devices connected, it actively requests the host for connection and data transmission via wired or wireless communication. The connection is cut after the data transmission is completed.

UDP Mode

Serial devices can connect to hosts for continuous data transmission via wired or wireless communication with a DVW. The UDP mode enables better transmission performance compared to the TCP mode, and it is suitable for real-time information display systems, such as electronic billboards. It is less applicable to highly critical systems.

Pair Connection

Pair a DVW with a serial host and another with a serial device. The pairs can use the existing wired or wireless network for communication. When the distance exceeds 100m, replace the network cable with RS-485 for a longer transmission distance of up to 1,200m.

Introduction to MODBUS Gateway

▲ 32 TCP Masters with 32 TCP Slaves

Via wired or wireless communication, up to 32 TCP masters can connect to serial slave devices, and each serial master can connect up to 32 TCP slaves.

Delta IEXplorer Search Tool

IEXplorer provides users with a friendly access to search for all IES products on the network. One simple click calls for the Web page for software function setting.

Industrial IEEE 802.11 a/b/g/n Wireless AP/WDS/Client/Gateway

- ▶ Compliant with IEEE 802.11n wireless technology capable of up to 450Mbps data rate
- ▶ Backward compatible with 802.11 a/b/g standards for seamless integration
- ▶ Multiple Wireless Modes: AP, Client CPE, WDS P-T-P, WDS P-T-MP and Repeater
- ▶ 3 x 3 MIMO technology increases data rate
- ▶ Wireless QoS (IEEE 802.11e, WMM) for video packets precedence transmission
- ▶ Enhanced wireless security: 64/128-bit WEP, WPA/WPA2, WPA-PSK/WPA2-PSK (TKIP/AES) and 802.1x Authentication
- ▶ Enhanced LAN security: MAC/IP/TCP/UDP filtering, HTTPS, SSL, 802.1X
- ▶ Supports 2-port RS-232/422/485-to-Ethernet Device Server
- ▶ Up to 16 simultaneous connections allows multiple hosts collection
- ▶ Built-in 2-port MODBUS ASCII/RTU to MODBUS TCP Gateway
- ▶ Up to 32 TCP masters or 32 TCP slaves per port at the same time
- ▶ Built-in 20MB buffer memory avoids data loss once the connection is down

- ▶ STP/RSTP for network redundancy further ensures reliability and avoids network loops
- ▶ Automatic IP assignment by DHCP/BootP server for easy network construction
- ▶ SNTP (simple network time protocol) for network clock synchronization
- ▶ Broadcast/Multicast/Unknown Unicast storm control improves throughput problems
- ▶ MAC addresses locking function per Ethernet port blocks unauthorized access
- ▶ USB console interface for easy connection with laptops
- ▶ Supports MODBUS TCP protocol for facilitating the remote management by SCADA or with other industrial devices
- ▶ CPU utilization displays the amount of work the CPU handles
- ▶ Auto warning by email, DI, relay, Syslog & SNMP trap

Industrial 3G Cloud Routers

- ▶ Data acquisition equipment connected to cloud servers. Supports a two-way data collection channel between the device and the cloud
- ▶ Sets up a secure tunnel between the user and the remote device via the cloud server, without the need of additional VPN servers
- ▶ Supports MODBUS TCP and MODBUS ASCII/RTU protocols
- ▶ Using UMTS/HSPA+ 3G technology, supports a wide range of bands (800/850, 900, AWS1700, 1900, 2100 MHz), downward compatible with GSM / GPRS / EDGE 2G network
- ▶ HSPA+ data transmission rate up to 21.6 Mbps (downlink)/ 5.76Mbps (uplink)
- ▶ Automatic APN parameter matching and connection redial
- ▶ Various peripheral interfaces include RS-485, RS-232 and LAN ports
- ▶ Built-in RTC and supports NTP time synchronization over a network
- ▶ Firewall functions: Stateful Packet Inspection (SPI), Prevent Denial of Service (DoS) attacks, NAT, port triggering, port mapping, IP address filtering, MAC address filtering, URL filtering
- ▶ Supports TCP/IP, UDP, ICMP, DHCP, HTTP, DNS and SSH protocols
- ▶ Scheduled jobs are available
- ▶ Device configurations import /export
- ▶ Network data flow statistics
- ▶ Networking failure diagnostics
- ▶ Device and PLC interlocking
- ▶ Custom alarm conditions with email alerts

- LAN: 4 10/100Base-T, auto MDI/MDI-X, auto negotiation

Serial Communication

Serial Ports :

- 1 RS-232 (3-pin Terminal block), 1 RS-485 (3-pin Terminal block), 15KV isolation protection

Baud Rate:

- 2400bps to 115200bps

Data Bits:

- 7, 8

Parity:

- None, Even, Odd

Stop Bits:

- 1, 2

Flow Control:

- RTS/CTS (RS-232 only), XON/XOFF

RS-232:

- TxD, RxD, RTS, CTS, GND

RS-485

- D+, D-, GND

LEDs

Device:

- POWER, READY, SIM1, SIM2, SD, Signal Strength

RJ45 Ports:

- 100M, LINK/ACT

Serial Ports:

- RS-232, RS-485

SIM Slot

- Number of SIMs: 2, Mini-SIM (25mm x 15mm)
- SIM Operating Voltage: 1.8V/3V

SD Socket

- SDHC(32mm x 24mm x 2.1mm), up to 32GB

Reset Button

- 1 set

3G RF

Frequency Band:

- UMTS/HSPA+: 800/850, 900, AWS1700, 1900, 2100 MHz
- GSM/GPRS/EDGE: 850, 900, 1800, 1900 MHz

Data Transmission Rates

HSPA+:

- Up link 5.76 Mbps
- Down link 21.6 Mbps

IFD9506 Series

Industrial 1-Port Serial-to-Ethernet MODBUS Converters

- ▶ Standard MODBUS TCP protocol with universal compatibility
- ▶ MODBUS RS-232/485 to MODBUS TCP Converter
- ▶ MODBUS TCP server connections: 16 (serial master mode)
- ▶ MODBUS TCP client connections: 8 (serial slave mode)
- ▶ Connectable to various devices and Ethernet ports with user-defined format
- ▶ Serial servers support simultaneous duplex transmissions of user-defined data (1 on 1)
- ▶ Isolation in RS-485 channel for stable communication
- ▶ Smart Monitor function for faster response from the Ethernet end in serial master mode
- ▶ Provides Web browser settings and real-time monitoring of terminal devices
- ▶ Virtual COM enables Ethernet communication for software that only supports serial
- ▶ Real-time automatic alarm notifications through email when triggered by DI
- ▶ IP filter function for enhanced network security
