## **CPR Series Corrosion Resistant Conductive Probe**

ATC Diversified Electronics announces the release of the new CPR series conductive probe.

The CPR series is a corrosion resistant conductive probe (dependent on application media) designed to be wire suspended in liquid and can operate with ATC-Diversified Electronics’ LPC series liquid level pump controller.

Specifications include a 316 stainless steel tip, PVC shield material (0 to 66 degrees operate) and is available in cable lengths of ten, twenty, thirty and forty feet.

For more information regarding the new CPR series please contact your ATC-Diversified Electronics Regional Sales Manager or call:
