

AP12 - Encapsulated Industrial Control Transformers

Series AP12 Industrial Control Transformers are designed to comply with industrial and automotive specifications that require the control transformer to be mounted in a separate enclosure, remote from the main control panel. Series AP12 control transformers eliminate the need to purchase a separate enclosure, as these units are encapsulated within a NEMA 12 enclosure suitable for remote mounting.

External or remote mounting of the Series AP12 conserves critical panel mounting space and reduces internal control cabinet temperatures, which can be critical to the reliable operation of many solid state, logic, and thermal control devices.

Features

- All copper windings.
- NEMA 12 enclosure and encapsulated core

and coil construction.

- **180°C Insulation System and 55°C Temperature Rise** for long service in high ambient environments.
- **50/60 Hertz.**
- **Capacity range from 1 kVA to 10 kVA.**
- Available primary voltages include 208, 240, and 380, 480, 575, 600. Secondary voltage is 120 volts.
- Primary and secondary leads are equipped with ring terminals for convenient connections.
- **Regulation characteristics** equal or exceed the highest industry standards.
- **Electrostatic shield** available as an extra cost option.
- Consult factory for desired voltage combinations and kVA sizes not listed.

General Information

Series FP12-Encapsulated Industrial Control Transformers

Series FP12 Industrial Control Transformers are similar to the AP12 Series with two important differences. The FP12 Series is 115°C rise (versus 55°C) and they are manufactured with an electrostatic shield between primary and secondary.

They are designed to comply with industrial and automotive specifications that require the control transformer to be mounted in a separate enclosure, remote from the main control panel.

External or remote mounting of the Series FP12 conserves critical panel mounting space and reduces internal control cabinet temperatures, which can be critical to the reliable operation of many solid state, logic, and thermal control devices.

and coil construction.

- **180°C Insulation System and 115°C Temperature Rise** for long service in high ambient environments.
- **Electrostatic Shield.**
- **60 Hz except 380/575-120 which is 50/60 Hz.**
- **50/60 Hz unit weights are approximately 20% higher than those shown.**
- **Primary and secondary leads** are equipped with ring terminals for convenient connections.
- **Regulation characteristics** equal or exceed the highest industry standards.
- Consult factory for desired voltage combinations and kVA sizes not listed.

Features

- **All copper windings.**
- **NEMA 12 enclosure** and encapsulated core
