

700 LUMEN RECHARGEABLE USB LANTERN

Model #: 41-1081

The Green Lantern Rechargeable Power Bank is loaded with options.

It features an ultra bright 700 lumen spot light with an impressive run time of 3 hours on high, and a beam distance of 575 meters. On low, the light provides 270 lumens and an unbeatable 8 hour run time.

In addition, it can recharge USB devices such as cell phones and tablets so you're never out of touch, even in an outage.

Additional light sources on each side of the lantern bring safety and versatility to a whole new level. One side is a bright area lantern with over 100 lumens of light, while the other side has a 20 LED emergency flasher that will run for 48 hours. The back/tail of the light provides two push button switches to operate the side lights independently.

The light also contains a power indicator that gives you accurate readings of how much power you have left. The Green Lantern is ultra-lightweight at only 1.11 pounds. (41-1081)

PRODUCT FEATURES
