

## SERIES CDT | CARBON DIOXIDE/TEMPERATURE TRANSMITTERS

wall mount

wall mount

Duct mount

#### **FEATURES/BENEFITS**

- Single beam dual wavelength NDIR sensor eliminates drift due to light source aging offering long time stability, especially when used in areas that can be occupied 24 hours a day
- Integral passive temperature outputs reduce number of devices mounted in the space
- Integral display and relay output options to meet building requirements
- · Service display tool available for models without an integral LCD helps save time during set-up and commissioning

#### **APPLICATIONS**

- Demand control ventilation in schools, office buildings, hospitals, and other indoor environments
- LEED<sup>®</sup> certification

#### DESCRIPTION

The Series CDT Carbon Dioxide and Temperature Transmitters accurately monitor the CO<sub>2</sub> concentration and temperature in indoor environments to help achieve energy savings. For increased sensor accuracy, a single beam dual wavelength non-dispersive infrared (NDIR) sensor is used to automatically correct the measurement in both occupied and unoccupied buildings against light source aging effects. The single beam dual wavelength sensor technology provides the highest level of accuracy compared to Automatic Baseline Correction methods which can unintentionally shift the calibration based on CO2 levels and barometric pressure conditions. In order to achieve a higher level of accuracy, the Series CDT includes digital barometric pressure adjustment and the ability to field-calibrate the sensor.

For applications that require visual indication, the wall mount configurations of the Series CDT can be ordered with an integral LCD display. Push buttons are standard on all configurations of the transmitters for access to the menu structure, but wall mount configurations can be ordered without the buttons. To prevent tampering, the action of the buttons can be locked out using an internal dip switch selection.

#### **SPECIFICATIONS**

Sensor	Single beam, dual wavelength NDIR.
Range	CO2: 0 to 2000 or 0 to 5000 PPM (depending on model); Temperature: 32 to 122°F (0 to 50°C).
Accuracy	CO2: ±40 PPM ±3% of reading; Temperature: ±1°C @ 25°C.
Temperature	±8 PPM/°C at 1100 PPM.
Dependence	
Non-Linearity	16 PPM.
Pressure Dependence	0.13% of reading per mm of Hg.
Response Time	2 min for 99% step change.
<b>Duct Air Velocity Range</b>	0-4000 FPM (20.32 m/s).
Temperature Limits	32 to 122°F (0 to 50°C).
Humidity Limits	10 to 95% RH (non-condensing).
Power Requirements	16-35 VDC or 19-28 VAC.
Power Consumption	Average: 2 w; Peak: 3.75 w.
Output	Current: 4-20 mA (max. 500 Ω); Voltage: 0-5 VDC or 0-10 VDC (min. 500 Ω); Relay: SPST NO rated 2 A @ 30 VDC.
Weight	4.4 oz (125 g).
Enclosure Rating	Duct mount: NEMA 4X (IP66) for housing only; Wall mount: IP20.
Agency Approvals	CE.

#### **HOW TO ORDER**

Use the **bold** characters from the chart below to construct a product code.

#### ACCESSORIES

Model	Description
GCK-200CO-2000CO2	Calibration gas kit includes a 99.99% nitrogen gas cylinder for calibrating the zero point and a 200 PPM CO / 2000 PPM CO2
	gas cylinder for calibrating the span point on Dwyer's gas sensing transmitters
A-449	Remote LCD display allows remote indication of select Dwyer® wall mount transmitters for validation or certification purposes
A-449A	Remote LCD display with buttons allows remote indication and calibration of select Dwyer® wall mount and duct mount
	transmitters for validation and certification purposes
A-CDT-KIT	Accessory kit including terminal block and power supply
