

Insulated Braided Conductor (IBSB & IBSBR)

Ideal connection for molded case circuit breakers

Features

- Material savings: Integral palm without lugs or terminals
- Quick and easy to install: Less labor time for installation
- Weight savings: A flat braid weighs less than a cable (with insulation) and lugs. Offers better copper usage (Skin Effect)
- Reliability – No extra contact due to the lugs being crimped at the extremities of the cables.
- Resistant to vibration - ideal alternative to cable
- Max. working voltage: 1000 V AC-1500 V DC-IEC & UL 758
- Max. working voltage: 600V AC/DC – UL 67
- IEC 60439.1 & IEC 61439.1

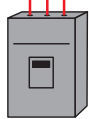

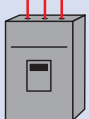

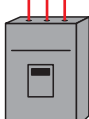

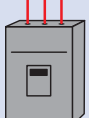

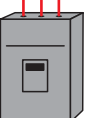

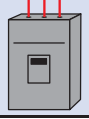

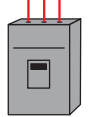

The IBSB and IBSBR range can be used as an alternative to cable for all low-voltage applications. It is suitable and connectable for molded case circuit breaker ranges, including most compact breakers on the market. From 80 A up to 630 A circuit breakers, you can directly connect the IBSB/IBSBR on the front access terminals breaker without additional accessories, such as angular connectors, spreaders, ring terminal connectors or extenders. No lugs and no cutting, stripping, or crimping are necessary.

Very simple! Very quick! Ready to use!

Insulated Braided Conductor (IBSB & IBSBR)

Ideal connection for molded case circuit breakers
