

Magnetic Switches

60 Series

Edwards magnetic switches are designed to activate a variety of signaling devices. Normally open circuits close when the magnet engages. SPDT switches are for open circuit systems or for central office operation. Normally closed circuits open when the magnet engages. For accessories, see Magnetic Switch Accessories, page 10-24.

Used for commercial, industrial, and residential burglar alarm systems.

FEATURES

- > Normally open , normally closed or SPDT switches available
