ER52000 Series

Hardened Unmanaged 8-port 10/100BASE M12 (8 PoE) + 2-port 10/100/1000BASE M12 Ethernet Switch

Overview

EtherWAN's ER52000 series provides a hardened 10-port switching platform supporting IEEE802.3at Power over Ethernet. The ER52000 series provides high performance switching for mission-critical applications in harsh environments, where sustained connectivity is crucial.

The ER52000 is equipped with 8 10/100BASE-TX PoE ports, in combination with two gigabit M12 options and gigabit ports with bypass relay functionality. The ER52000 is feature rich, offering 9.6K Jumbo Frame support on gigabit ports, full wire speed gigabit throughput.

The IEEE802.3at PoE ports provide up to 30 watts per port, with a total power budget of 120 watts. This ensures maximum versatility for connection with PoE powered devices that have varying bandwidth and power consumption requirements, such as outdoor PTZ dome cameras, wireless access points, and wayside communication devices.

Bypass Relay Function

The ER52000 supports bypass relay function on bypass ports: When the switch is operating normally, these two bypass ports work in the same way as other ports, processing and forwarding frame ingressions. In the event the switch stops working due to a power failure, the bypass relay function will be triggered to ensure non-stop data flow.
