► Model SLM200

StreamLine® Modular High Output Multifunctional LED Beacon

Model SLM200 offers a multifunctional LED beacon with high optical performance. Developed with a multiple input technology, Model SLM200 allows three separate light effects (flashing, simulated strobe or random) controllable via independent electric contacts.

The flashing light mode has a powerful effect ideal for attracting attention without alarming. If immediate attention is needed, the simulated strobe is the ideal option. The random light pattern is unique in its ability to irregularly flash while drawing attention.

Model SLM200 body material is a self extinguishing polycarbonate material with high impact and UV resistance suitable for outdoor applications.
