## Definite Purpose Controls

## Full Voltage Contactors

GE's New Definite Purpose Controls Deliver Definite Advantages
CR453C Compact

20A-40A
1-pole, 1-pole + shunt and 2-pole

Multiple terminal configurations on line and load terminals allow selection of the right terminals for the job. Choose from hex head screw terminals with slotted/Phillips head or box lug terminals, all with or without quick connect

Cover (standard on 40A, optional on 25A-30A) offers increased protection from contaminants.

Wide array of coil voltages and frequencies allows the

Low VA "no burn" coil design allows minimum CPT requirement and failsafe reliability during brownout conditions. Features standard $1 / 4^{\prime \prime}$ dual quick connect angled terminals for ease of wiring. Coils are tape wrapped for superior durability and protection from damage.

Universal mounting plate with multiple elongated holes allows the compact contactors to be used with the same mounting holes as existing designs-allowing easy replacement or simple substitution.

Outstanding performance meets all pertinent standards: UL Component Recognized, CSA, CE and ARI 780-insuring long service life and suitability in the application. All ratings meet $6 x$, $5 x, 4 x$ locked rotor amp rating at 240,480 and 600 V respectively. Tested for endurance per ARI 780, all contactors meet or exceed for 500,000 mechanical and 200,000 electrical operations.

## Standard Forms

Standard CR453C contactors feature hex screws with \#2 Phillips/ slotted heads on the 20-35FLA devices and box lugs on 40FLA forms. Each pole is supplied with four $1 / 4^{\prime \prime}$ quick connect terminals. Coils are provided with two $1 / 4^{\prime \prime}$ quick connect terminals.
For configurations not found below see page 4-5 for Factory Modified Forms.

## Factory Installed Modifications

CR453C Definite Purpose Contactors, 20A-40A, 1-pole \& 2-pole Compact Design
Select contactor from the main table and complete the product number by inserting the digits corresponding to required and optional specifications from the tables below. Note: all factory modified forms require a minimum order of 200 and additional multiples of 20 . See page 4-32 for bulk pack details.
