

DRIVEN BY POSSIBILITY™

# HI-POWER™ DUBL-V & DUBL-V FEATHER PICKER

## WRAPPED, CLASSICAL CROSS SECTION DOUBLE SIDED V-BELT

Designed with a unique recessed top and bottom to maintain sidewall contact, while remaining flexible for belt drive applications that require power transmission from both sides of the belt.

### CONSTRUCTION + SPECIFICATIONS

- **Gates Curves** provide proper cord support and full contact with the sheave-groove for uniform loading, uniform wear, and increased belt life.
- **Flex-Bonded cords** are strongly bonded to the body of the belt resulting in equal load distribution and the absorption of bending stress without cord deterioration.
- **Flex-Weave™** oil and heat resistant cover protects the belt core from the toughest environments.

### FEATURES + BENEFITS

- Ideal solution for "serpentine" drives (drives with counter rotating shafts) where power is transmitted from both the top and the bottom of the belts.
- Additionally, feather picker belt variants are specially designed for maximum performance on de-feathering machines found in the poultry industry.
- Field tests prove Gates belts run 3-6 months and more compared to similar competitor belts that last only 1-3 weeks.
- Fully wrapped construction, eliminates debris and dust concerns found in competitive double notch belts.
- All sizes meet Gates V80® system matching tolerances.
- Meets ARPM/RMA IP-3-2 oil and heat resistant standards.
- Meets ARPM/RMA IP-3-3 static conductivity requirements.
- REACH and RoHS 2 compliant.
- Operating temperature range: -30°C/-22°F to +60°C/140°F.
