

**GTF**
**CONFIGURABLE POWER CONTROLLERS WITH SERIAL COMMUNICATION IN MODBUS RTU**

Modular monophase power controller with heatsink, 25A / 480VAC (25A at 40°C, voltage range 90 - 530 VAC). Control inputs: digital, programmable analog V, I, Potentiometer. Firing type configurable for: ZC "zero crossing", BF "burst firing", HSC "half single cycle", PA "phase angle".

- Configurable analog control input (0-10V, 4-20mA)
- Faceplate protection: IP20
- Overvoltage protection
- Overtemperature function alarm
- Current V, I, P limit
- Modbus RTU digital communication
- Integrated fuse
- PID temperature control function
- Nominal working temperature 40°C
