

All models are rugged, totally self-contained, and allow the user to benefit from the improved efficiency and quality that goes with pressure monitoring. The Gefran melt pressure gauge provides reliable, maintenance-free, localized pressure indication. The small capillary tube filled with a special medium isolates the gauge housing from potential thermal damage.

### MAIN FEATURES

- Economically priced
- 1.5 times overload capacity
- Easy-to-read display
- 1/2-20 UNF thread standard, M18 x 1.5 also available
- 15-5 PH stainless steel diaphragm with GTP+ coating standard (others available on request)
- No power required

**M50** The rigid stem configuration makes installation fast and easy.

**M51** The flexible configuration is designed for applications requiring further thermal isolation or where installation would be otherwise difficult or impractical.

**M52** The pressure/temperature configuration requires only one mounting hole for the measurement of both process values.
