## 2000 Series Geared Rotary Limit Switches

## SUPERIOR DESIGN AND OPERATING FEATURES

## Quality parts make each Geared Rotary Limit Switch highly dependable.

- The limit switch's $1 / 21$ input shaft drives a bronze gear which rotates the cam block. The cam block houses independently adjustable cams that actuate the precision type snap action switches.
- Each switch can be provided with one to four single pole, double throw switches or a maximum of two double pole, double throw switches for versatility of control circuits.
- No minimum speed is specified because snap action contacts are used. Maximum rated speed of the worm shaft is 1000 RPM and can be rotated clockwise or counterclockwise.
- Gemco ${ }^{\oplus}$ Rotary Limit Switch offers the broadest range of standard gear selections of any switch available. Standard ratios range from 5:1 through 5333.3:1.
- Operating temperatures from $-40^{\circ} \mathrm{F}$ to $180^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right.$ to $\left.82.2^{\circ} \mathrm{C}\right)$.
- UL and CSA Rated Snap Action Switches.

All Metal Gearing for Longevity

## DESCRIPTION

AMETEK Factory Automation markets, engineers, and manufactures sensors and controls for demanding and harsh industrial environments. The Gemco ${ }^{\circ}$ Geared Rotary Limit Switches are primarily used in material handling and rotary operations where motion is expressed in shaft rotation.
The input shaft is typically connected to the motor or drive mechanism, after a set amount of turns, the cam trips the switches, thus starting or stopping the movement. The primary purpose of the switch is to control the intermediate or end limits in linear or rotary motion. The switch is often used as a safety device to protect against accidental damage to equipment due to overtravel. Our Geared Rotary Limit Switch line is designed for longevity. Units include all metal gearing and switches that are rated for 15 million operations.

In the $\mathbf{2 0 0 0}$ Series, there are three different enclosures with either Worm or Spur Gear drive mechanisms. These enclosures provide a clean environmental condition for the industrial duty snap action switches. When motion can be expressed in shaft rotation; either through a roller chain, gear train, or direct coupling, the Gemco ${ }^{\otimes}$ Geared Rotary Limit Switches make it possible to open or close, up to four independent circuits at the desired angular positions.
The 2000 Series switches are provided in a variety of enclosure styles and ratios to meet your mounting and environmental conditions. NEMA 12, 4,7 \& 9 enclosure ratings are available.

## Simplicity is the key to success

## - Easy to Install \& maintain

o These limit switches may be mounted in any orientation. When installed properly, they will provide long life with a minimum amount of service/ maintenance.

## ENCLOSURES

Series $\mathbf{2 0 0 0}$ (General Purpose) NEMA 12 enclosure, molded from Fibralloy ${ }^{\circledR}$, a special fiberglass material that is resistant to acids, alcohols, hydrocarbons and heat. A tight fitting synthetic gasket prevents the entrance of oils and coolants. External mounting holes enable switch mounting without internal interference. Available in 2, 3 and 4 circuit units with either SPDT or DPDT switches, with ratios from 5:1 to 5333:1.
Permissible speeds to 1000 RPM. (See Figures 1 and 2.)

- NEMA 12 - General Purpose, shock resistant Fibralloy ${ }^{\ominus}$ enclosure
- $1 / 2^{\prime \prime}$ Input Shaft with Woodruff Key for quick drive connection
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratios from 5:1 to 5333:1
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel cams for longevity
- Snap Action Switches - SPDT or DPDT - UL Recognized and CSA approved

## ENCLOSURES

2000 Series (Watertight) NEMA 4 enclosure, made of cast aluminum with $1 / 2^{\prime \prime}$ input shaft. External mounting holes enable switch mounting without internal interference. Available in 2,3 and 4 circuit units with either SPDT or DPDT switches, with ratios from $5: 1$ to $5333: 1$. Cast iron or cast bronze enclosures can be provided upon request. Permissible speeds to 1000 RPM. (See Figure 3)

- NEMA 4 - Heavy Duty, Cast Aluminum enclosure
- $1 / 2^{\prime \prime}$ Input Shaft with Woodruff Key for quick drive connection
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratios from 5:1 to 5333:1
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel cams for longevity
- Snap Action Switches - SPDT or DPDT - UL Recognized and CSA approved
- Optional Cast Iron \& Cast Bronze enclosures available upon request

2000 Series (Hazardous Locations) NEMA Type 7 \& 9, made of cast aluminum with $1 / 2$ " input shaft. External mounting holes enable switch mounting without internal interference. Available in 2,3 and 4 circuit units with either SPDT or DPDT switches, with ratios from 5:1 to 5333:1 Permissible speeds to 1000 RPM.

- NEMA 7 \& 9 - Heavy duty, Cast Aluminum enclosure
- $1 / 2^{\prime \prime}$ Input Shaft with Woodruff Key for quick drive connection
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratios from 5:1 to 5333:1
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel cams for longevity
- Snap Action Switches - SPDT or DPDT - UL Recognized and CSA approved

These enclosures are designed and manufactured to our interpretation of the following Underwriters Laboratory (UL) standards and have not been submitted for 3rd party approvals:

- UL 1203 Explosion-Proof and Dust-Ignition-Proof Electrical Equipment for Use in Hazardous (Classified) Locations (Second Edition, July 27, 1994)
- UL 698 Industrial Control Equipment for Use in Hazardous (Classified) Locations (Twelfth Edition June 22, 1995)

## SPUR GEAR TYPE - GEARED ROTARY LIMIT SWITCHES

GEMCO's Spur Gear Type Rotary Limit Switch is used in applications requiring ratios below 3:1 and 1:3 for controlling the end and/or intermediate limits of reciprocating or rotary motion. This device extends the line of Gemco Geared Rotary Limit Switches by providing ultra-sensitive control for small increments of motion. Our Spur Gear Type switches are available in our NEMA 12, NEMA 4, and NEMA 7 type enclosures. Each enclosure can accommodate from two to four SPDT switches or two DPDT switches. All switches are provided with silver to silver contacts for reliability along with screw type terminals.

The switches are actuated by independently adjustable cams which are driven by the input shaft. All cams are mounted on a common block, which is directly coupled or geared to the drive shaft.

## Enclosures

NEMA 12 (General Purpose) enclosures consist of a die cast housing and Fibralloy ${ }^{\bullet}$ cover. All mounting holes are external to the wiring cavity eliminating interference with internal wiring when the switch is mounted. Captive screws fasten the cover to the die cast housing and eliminate problems of misplaced screws.
NEMA 4 and 7 enclosures are constructed of cast aluminum to prevent corrosion. Cast Iron and Cast Bronze enclosures can also be provided on special request. All units are provided with an attractive red wrinkle finish.

## Ratios

Standard geared ratios between the input shaft and cam block are 1:1, $1 / 2: 1,1 / 3: 1,2: 1$, and 3:1. The 1:1 ratio may be supplied with a potentiometer gear coupled to the input shaft with ratios of 1:1, 1:2 and 1:3. All units come standard with our $25^{\circ}$ Cams. Longer dwells available, consult factory.

## Mounting

Unique mounting features permit these switches to be installed in any of three different positions. Mounting holes are provided for either direct or sprocket drive applications.

## Potentiometer- Optional

An optional feature of mounting a 2-watt potentiometer within the enclosure, and gear coupled to the input shaft, is offered. This feature permits the potentiometer to be used as a remote position indicator or as a constant output auxiliary control device for open or closed loop feedback systems.

- Available in NEMA 12, 4 \& 7 style enclosures
- $1 / 2$ " Input Shaft with Woodruff Key for quick drive connection
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratios from 1:3 to 3:1
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel cams for longevity
- Snap Action Switches - SPDT or DPDT - UL Recognized and CSA approved
- Unique mounting - Mounting holes are provided for either direct or sprocket drive applications in three different positions
- Optional Potentiometer outputs available upon request

In selecting a gear ratio, maximum accuracy and ease of adjustment are more easily obtained if rotation of the input shaft between limits is equal to, or less than, maximum settings between limits. For example, if .8 revolutions of the input shaft is required to open and close a valve, a gear ratio of 1:1 input to cams should be selected.

SPUR GEAR TYPE (NEMA 12)

Approximate shipping weight - 3 lbs .

SPUR GEAR TYPE (NEMA 4, 7 \& 9)

Approximate shipping weight - 4.5 lbs .

## HEAVY DUTY TYPE - GEARED ROTARY LIMIT SWITCHES

2000 Series (Heavy Duty) - NEMA 12 enclosure, made of cast aluminum with $3 / 4^{\prime \prime}$ Input shaft. External mounting holes enable switch mounting without internal interference. Available in 2, 3 and 4 circuit units with either SPDT or DPDT switches, with ratios from 5:1 to 3000:1. Permissible speeds to 1800 RPM.

Ruggedly built, GEMCO'S Heavy Duty Rotary Limit Switches have gained wide acceptance on installations such as mechanical press ram adjustments, press extractors and shuttles which require dependable trouble-free performance. These installations require a limit switch that will withstand rapid starting and stopping, shock, vibration and still successfully control the end or intermediate limits of such devices. Because of these demands and the high reliability required, GEMCO'S heavy-duty Rotary Limit Switch far exceeds any on the market.

- NEMA 12 - Heavy duty, Cast Aluminum enclosure
- 3/4" Input Shaft with Woodruff Key on 5:1-30:1 ratios
- $1 / 2$ " Input Shaft with Woodruff Key on 125:1-3000:1 ratios
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratios from 5:1 to 3000:1
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel cams for longevity
- Snap Action Switches - SPDT or DPDT - UL Recognized and CSA approved

2000 Series Geared Rotary Limit Switches

## ELECTRICAL SWITCH RATINGS

Note: Depending on which 2000 Series is ordered, it many contain a different type of electrical switch. Refer to Symbol letter in part number grid to determine which switch will be installed inside of the Rotary Limit Switch.

All 2 circuit module units will be supplied with switches that have easy to wire screw type terminals: See Figure 7.
All 3 and 4 circuit models will use a terminal type switch. See Figure 8. Consult factory for special tall cover options that allow NEMA 4, 7 \& 9 Enclosures, 3 \& 4 circuit units with switch screw type terminals. See Figure 9.

The terminal type and size for the 3 \& 4 circuit model switches will be "Quick Disconnect, Female, for 14-16 AWG wire, with .110" x .020" tab, insulated or non-insulated", customers option and supplied by the customer.

## SPECIFICATIONS

| Specifications |  |
| :--- | :--- |
| Enclosure | Varies by Product - Fibralloy ${ }^{\circ}$, Cast Aluminum. Cast Iron <br> and Cast Bronze housings available upon request |
| Housing - Material | Varies by enclosure type - See Product Description |
| Rating | Varies by enclosure type - See Product Description |
| Cover Gasket | Powdered metal impregnated bearings for life-time <br> lubrication |
| Bearings | $1 / 2^{\prime \prime}$ w/ 404 Woodruff Key - Maximum Load 5 Ibs. |
| Input Shaft | ASTM A311 Class B - Black Oxide Finish |
| Input Shaft - Material | 5:1 to 5333:1 |
| Gear Ratios - Available | Bronze |
| Gears - Internal | Steel - $25^{\circ}$ Lobe standard - Longer dwells available upon <br> request |
| Cams | SPDT or DPDT - UL \& CSA Approved. Rated for 15 million <br> operations |
| Switches | $-40^{\circ} \mathrm{F}$ to $180^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right.$ to $\left.82.2^{\circ} \mathrm{C}\right)$ |
| Operating Temperature | Worm Gear Type - 1,000 RPM Maximum <br> Heavy Dutyy Type - 1,800 RPM Maximum |
| RPM | Optional - Multi-turn wire wound, 2 watt |
| Potentiometers |  |

## 2000 Series Geared Rotary Limit Switches

## 2000 RIGHT ANGLE GEAR REDUCER ADAPTER

Flange Mount 40:1 Right Angle Gear Reducers are available for the 2000 Series, NEMA 4, $7 \& 9$ enclosures. The Right Angle Adapter is made of cast aluminum with $1 / 2^{\prime \prime}$ Slotted Input shaft.

- NEMA 4 Rugged Cast Aluminum baseplate
- $1 / 2$ " Input Shaft with slotted keyway for quick drive connection
- Self-lubricating Bearings - Powdered metal impregnated bearings for life-time lubrication
- Gear ratio 40:1 - In addition to ratio on Rotary Limit Switch
- External Mounting holes, permit mounting without internal interference
- Bronze gear and steel input shaft for longevity
- Bases available for 2000 Series and 2006 Series
- 2000 Series (NEMA 4, 7 or 9) - 2, 3, or 4 Circuit Model - SD0384300
