## CLEANROOM MONITOR

Mounting bracket

CR3A SERIES

PRODUCT DESCRIPTION

The CR3 Series Cleanroom Monitor was developed specifically to allow for monitoring of confined spaces with accuracy and reliability.
The CR3A features integrated sensors for monitoring temperature, humidity and pressure within the space it's mounted in. The CR3A is available with output signal of either Analog, BACnet ® or Modbus. Standard features include adjustable alarm relays for each parameter, audible/visual alarms, and large LED displays.

The CR3A is housed in a flush fitting stainless-steel front plate that enables the user to wipe down the unit when necessary.

TYPICAL INSTALLATION

For complete installation and wiring details, please refer to the product installation instructions.

The CR3 should be mounted inside an opening in the wall that is 210 mm wide x 167 mm high. Ensure the unit can be secured to a wall stud or equivalent on at least two sides.

BACnet® COMMUNICATION

BACnet® is a data communication protocol for building automation and control networks. The detector communicates on a standard 2-wire RS-485 MS/TP (master-slave/token-passing) network designed to run at speeds from 9600 to 76800 baud over twisted pair wiring.

BACnet® is a registered trademark of ASHRAE. ASHRAE does not endorse, approve or test products for compliance with ASHRAE standards. Compliance of listed products to the requirements of ASHRAE Standard 135 is the responsibility of BACnet International (BI). BTL is a registered trademark of BI.

MODBUS COMMUNICATION

Modbus is a network protocol for industrial manufacturing environments. The detector communicates on a standard Modbus network using either of two transmission modes: RTU (Remote Terminal Unit) or ASCII (American Standard Code for Information Interchange). The hardware interface is RS-485. Select the desired mode along with the other parameters using the Configuration Menu.
